

ASSISTED VOLUNTARY RETURN AND REINTEGRATION 2016 KEY HIGHLIGHTS

International Organization for Migration (IOM)
The UN Migration Agency

The opinions expressed in this report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of materials throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.

IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in meeting the operational challenges of migration, advance understanding of migration issues, encourage social and economic development through migration, and uphold the human dignity and well-being of migrants.

Acknowledgements

The authors Anh Nguyen, Nicola Graviano, Etienne Quillet and Nassim Kiamouche, would like to thank IOM colleagues Michele Bombassei, Rosilyne Borland, Sacha Chan Kam, Sarah Craggs, Yitna Getachew, Kirssy Gonzalez, Valon Halimi, Tim Howe, Laurence Hunzinger, Karolina Krelanova, Agueda Marin, Jonathan Martens, Carlo Mendes, Marija Nikolovska, Nazanine Nozarian, Irina Todorova and all the IOM colleagues in the field for their valuable contributions to this report.

FOREWORD

2016 has been a landmark year for the International Organization for Migration (IOM), in which IOM celebrated the 65th anniversary of its founding, and welcomed four new Member States, including China. On 19 September, following the signing of the agreement on IOM–UN relationship, IOM joined the United Nations System, marking a historic moment in the evolution of the Organization. In a world on the move, 2016 has also seen increased global focus on migration, offering hope and creating new opportunities for migrants and for stakeholders involved in the field of migration. Among recent milestones, 2016 also brought the adoption of the “New York Declaration” during the Summit on Refugees and Migrants, and negotiations of the Global Compact on “Safe, Orderly, and Regular Migration”, to be adopted at an intergovernmental conference in 2018. However, considerable challenges remain to be addressed given the growing complexity of migration trends worldwide.

Return has gained renewed political importance in the agenda of national and international policymakers around the world because of its impact on host countries, transit countries, countries of origin and of course migrants and their communities. Assisted voluntary return and reintegration (AVRR), firstly introduced by IOM in 1979, is increasingly looked at as an indispensable, effective component of contemporary migration governance, as it represents a humane and dignified way for a migrant to return, contributing to the socioeconomic well-being of migrants within their communities, and facilitating dialogue among all concerned stakeholders.

In line with the rising volume of migration in recent years, the number of AVRR beneficiaries has also significantly increased. In 2016, 98,403 migrants benefited from AVRR assistance, the highest level in the past fifteen years. It represents a sharp increase (approximately +40%) in comparison to 2015, which had already marked a considerable growth in comparison to previous years. Europe represented 83% of the total AVRR caseload in 2016, and Germany alone accounted for 54% of this total. These trends can be explained by a combination of factors, including continuous arrivals to Europe and the re-activation of the key funding instrument for AVRR from Europe, the Asylum, Migration and Integration Fund. Recent developments also indicate that returns from transit countries, such as Greece or Niger, and South–South returns are on the rise.

This year has also seen significant steps being taken towards a more comprehensive approach to migrant reintegration. Stemming from the need to address the various factors that influence a person’s ability to reintegrate into their country of origin, the European Union and IOM developed the Joint Initiative for Migrant Protection and Reintegration, funded through the EU Emergency Trust Fund for Africa (EUTF) and with contributions from Germany and Italy. This Initiative will target 14 countries in West and Central Africa as well as Libya, with the aim, inter alia, to increase protection and assistance to vulnerable and stranded migrants, including for voluntary return and reintegration. Similar programmes will also be implemented by IOM in the Horn of Africa, three countries in Asia and three countries in Southern Africa with the support of the European Union.

The AVRR Key Highlights report showcases some of IOM’s most significant contributions for the year 2016. This report is structured by two distinct though complementary chapters: while the first chapter presents an overview of current trends and facts for AVRR at both the global and regional levels, the second chapter provides the reader with a series of thematic highlights, showing how AVRR activities were implemented across the globe in 2016 from both policy and operational perspectives.

We wish you all a pleasant reading!

AVRR COMPARATIVE SNAPSHOT: 2016/2015

Total number of migrants assisted

In 2016, IOM provided AVRR support to **98,403** migrants, which represents a **41 per cent increase** as compared to the previous year.

The **sex distribution** (68% male, 32% female) remained the same between the two years.

Migrants in vulnerable situations

In 2016, IOM assisted **3,143 migrants in vulnerable situations**, including 1,253 unaccompanied migrant children, 995 migrants with health-related needs and 895 victims of trafficking.

Compared to the overall number of migrants assisted, the share of migrants in vulnerable situations assisted with AVRR decreased from 5 per cent in 2015 to 3 per cent in 2016.

Regions

The **European Economic Area** remained the region where most of the migrants returned from. **81,671** migrants returned from this region (**83%** of the total caseload), mainly to Albania, Iraq and Serbia.

South-Eastern Europe, Eastern Europe and Central Asia remained the region where most migrants returned to. **48,664** migrants returned to this region (**49%** of the total caseload), in their vast majority from Germany.

More than 10 per cent of AVRR beneficiaries returned **within the same region**. The West and Central Africa region accounted for **47 per cent** of these intraregional flows.

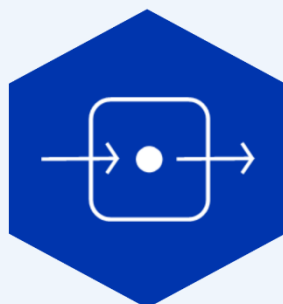

AVRR COMPARATIVE SNAPSHOT: 2016/2015

Countries

With **54,006** returns **Germany** remained the country from where most AVRR beneficiaries returned and accounted for **54 per cent** of the total. This represented a 52 per cent increase as compared to 2015. Niger (+260%), Greece (+64%) and the Netherlands (+58%) experienced an important increase of returns.

With **17,976** cases **Albania** remained the country to where the highest number of AVRR beneficiaries returned to. This accounted for a 50 per cent increase as compared to the previous year. Afghanistan (+402%), the Islamic Republic of Iran (+295%) and Iraq (+254%) experienced an important increase of returns.

AVRR from transit countries

The share of returns from **transit countries** remained stable as compared to the previous year, amounting to **more than 20 per cent** of the total number of returns globally.

Greece (+64%) remained the main country of transit with **6,153** cases. Niger (+260%), Djibouti (+82%) and Turkey (+185%) experienced an important increase of returns. On the contrary, a decrease of 68 per cent was observed in Indonesia.

Financial support to returnees

An estimated **USD 32.7 million** (an increase of 30 per cent as compared to 2015) was disbursed to financially support **39,000 returnees** (+39% as compared to the previous year) before departure or upon arrival in their country of origin.

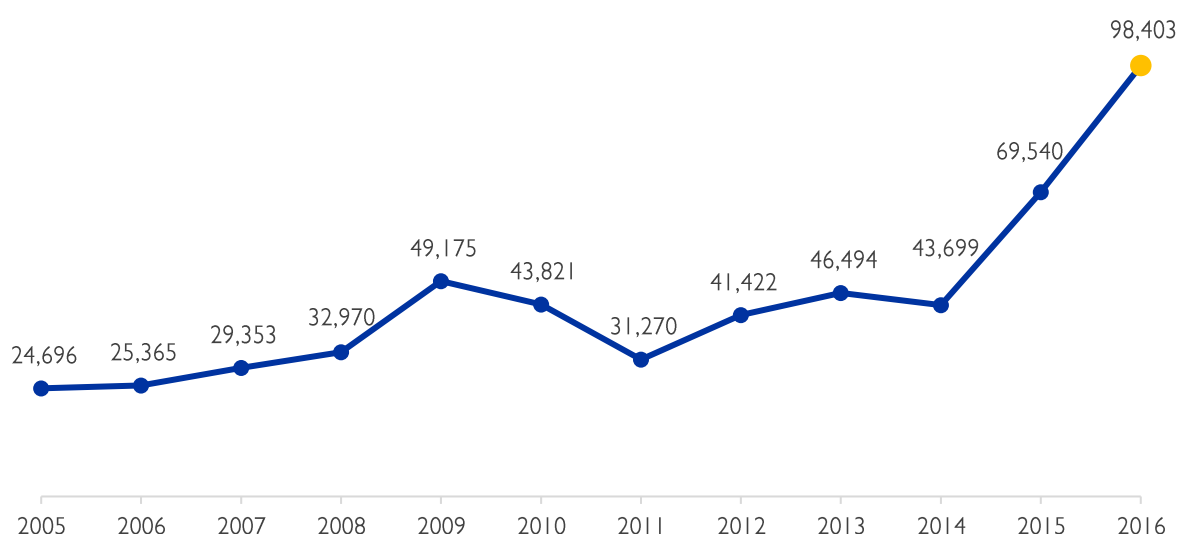

CHAPTER I – FACTS AND FIGURES

I. OVERVIEW

I.1. Main trends

2005–2016 overview

Chart I: AVRR overview, 2005–2016

IOM considers assisted voluntary return and reintegration¹ to be a humane and dignified approach to supporting migrants who are unwilling or unable to stay in a host or transit country and wish to return² to their country of origin. It is a core activity that the organization conducts for migrants and IOM Member States across the world.

Looking at the period from 2005 to 2014, the number of migrants assisted per year varied from approximately 25,000 to around 49,000, with a yearly average of 37,000 returns.

In 2015, IOM assisted 69,540 migrants to return voluntarily to their countries of origin (which represented a 60 per cent increase as compared to 2014).

This figure increased again in 2016, as IOM provided AVRR support to **98,403** migrants, from 110 host countries to 161 countries and territories of origin. As highlighted in Chart I, this is the highest caseload recorded over the last 15 years and the AVRR caseload more than doubled in just the last two years.

It is worth noting that these figures do not include voluntary humanitarian returns undertaken by IOM from Libya in 2016.

¹ Reintegration assistance may range from limited financial support before and/or upon arrival to more robust support (for example for income generation activities, housing or education related needs). The scope of such support, provided along with assisted voluntary return schemes, vary significantly, depending on

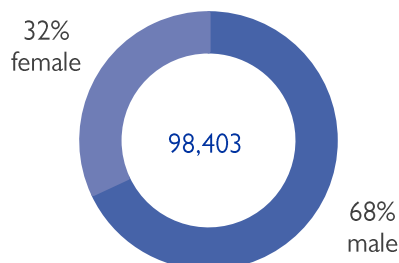

programme design and eligibility criteria. However, the term “AVRR” is used throughout the present report for easier reference.

² The term “return” used across the present report exclusively relates to AVRR facilitated by IOM.

Sex breakdown

Of the total 98,403 migrants assisted with AVRR in 2016, 68 per cent were male while 32 per cent were female. This is comparable to the sex breakdown of AVRR beneficiaries in 2015.

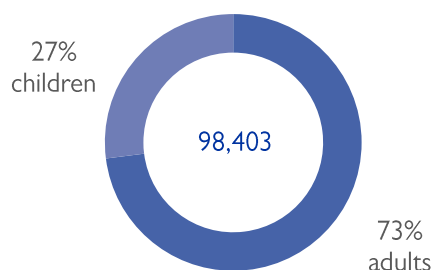

Chart 2: Sex breakdown of AVRR beneficiaries, 2016

Age breakdown

As highlighted in Chart 3, more than one in four AVRR beneficiaries in 2016 were children (27%), which is comparable to the share of children who were assisted with AVRR by IOM in 2015 (24%). More than half of the returnees (52%) were aged between 18 and 40.

Chart 3: Age breakdown of AVRR beneficiaries, 2016

Migrants in vulnerable situations

The provision of a specific and tailored assistance is particularly critical for returning migrants in vulnerable situations³ (which may be related to their age, traumatic experiences, psychosocial and medical condition, self-sufficiency, education or security concerns, among others) who may have particular protection needs. IOM implements specific projects and programme components targeting these specific needs and aiming at ensuring a more comprehensive and tailored approach.

The number of migrants in vulnerable situations assisted with AVRR hereafter reported is limited to the following migrant categories: unaccompanied migrant children, victims of trafficking, and migrants with health-related needs. In 2016, among all AVRR beneficiaries, over 3 per cent were migrants in vulnerable situations.

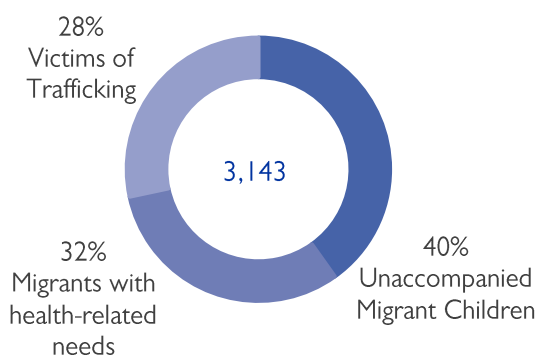

Chart 4 provides the breakdown of the **3,143 migrants in vulnerable situations** assisted with AVRR in 2016. As compared to 2015, this number remained relatively stable.

Looking at the breakdown per vulnerability types, the number of unaccompanied migrant children increased by 116 per cent as compared to the previous year. However, in comparison to the total AVRR caseload, the

share of unaccompanied migrant children only increased from 0.8 per cent in 2015 to 1.2 per cent in 2016.

The number of victims of trafficking assisted dropped by 51 per cent. The proportion of this category of migrants compared to the total number of migrants assisted decreased from 2 per cent in 2015 to 0.9 per cent in 2016. The number and the proportion of migrants with health-related needs remained stable between the two years.

Chart 4 : Vulnerability types breakdown of AVRR beneficiaries, 2016

³ While the concept of vulnerability does not focus solely on protected categories of migrants or on the migrant's membership in a particular group, data presented in this report relates to AVRR operations and is therefore limited to those migrants in vulnerable situations who are

assisted with tailored support in their voluntary return and reintegration process (i.e. unaccompanied migrant children, victims of trafficking, and migrants with health-related needs).

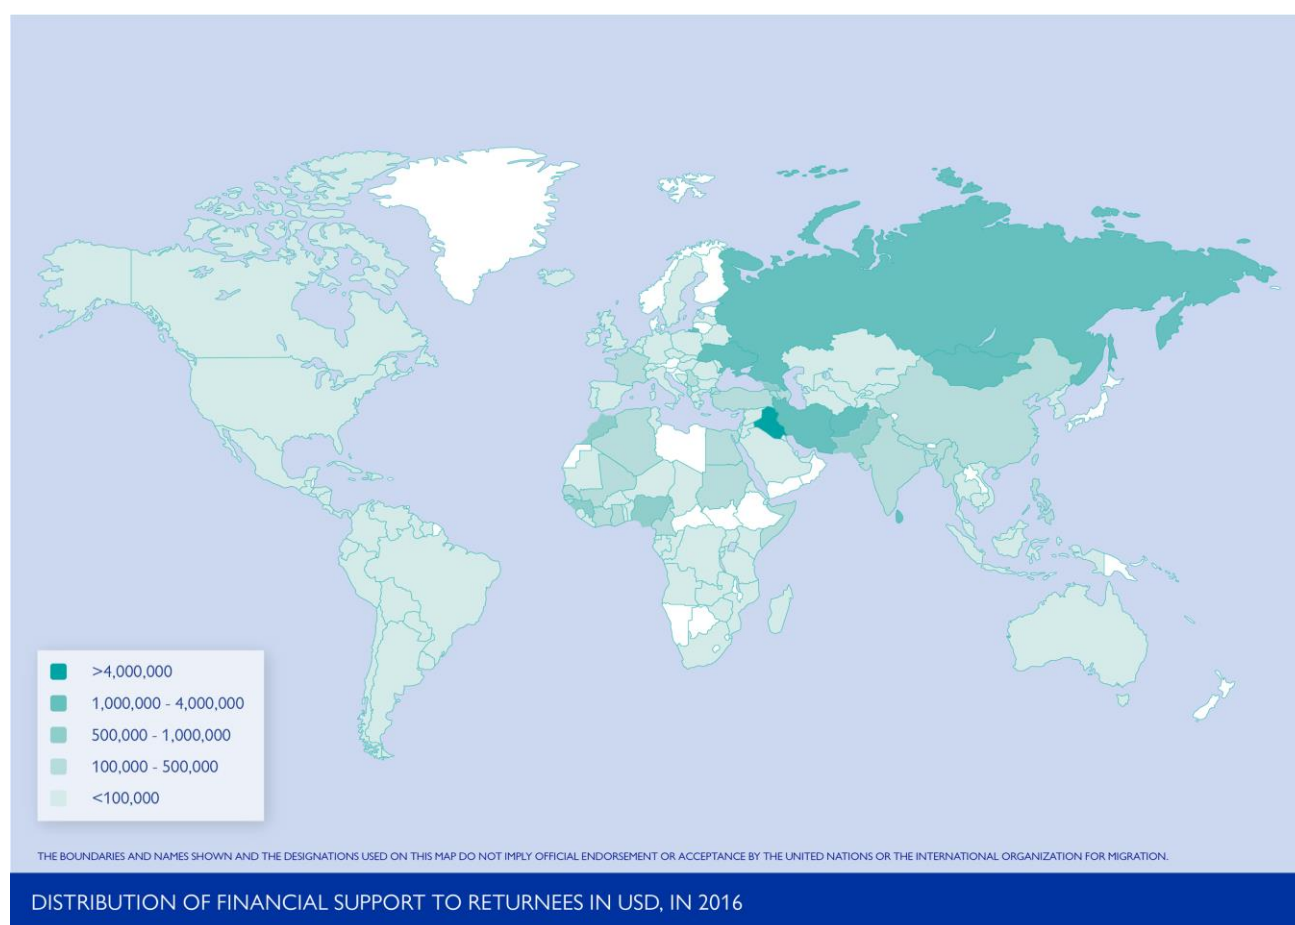

Financial support to returnees

In 2016, approximately 39,000 returnees⁴ were provided with financial support in cash⁵ and/or in kind before departure or upon arrival in 2016 in their countries of origin. This assistance allowed migrants to address their most immediate needs upon return and contributed to their reintegration in countries of origin through education and training, small business set-up, medical support, and/or housing.

The level of reintegration-related expenditures in 2016 is estimated at USD 32.7 million, from which 10 per cent was allocated to the support of activities directly targeting migrants in vulnerable situations.

As shown in the map below, this amount was mostly distributed to migrants returning to the Middle East and North Africa region (approximately 35%), the Asia and the Pacific region (approximately 32%) and the South-Eastern Europe, Eastern Europe and Central Asia region (approximately 19%).

Main countries/territories of origin where these expenses were made are Iraq (12%), Afghanistan (9%), UNSC resolution 1244-administered Kosovo⁶ (8%), Pakistan (8%), the Russian Federation (6%), the Islamic Republic of Iran (6%), Ukraine (5%), Georgia (5%), Mongolia (4%) and Bangladesh (3%).

⁴ This includes beneficiaries who returned in 2016 or in the previous years.

⁵ Cash support provided under AVRR is diversified, ranging from limited support to more robust financial

assistance. It includes cash provided before and upon arrival to help addressing migrants' most immediate needs upon return in their country of origin.

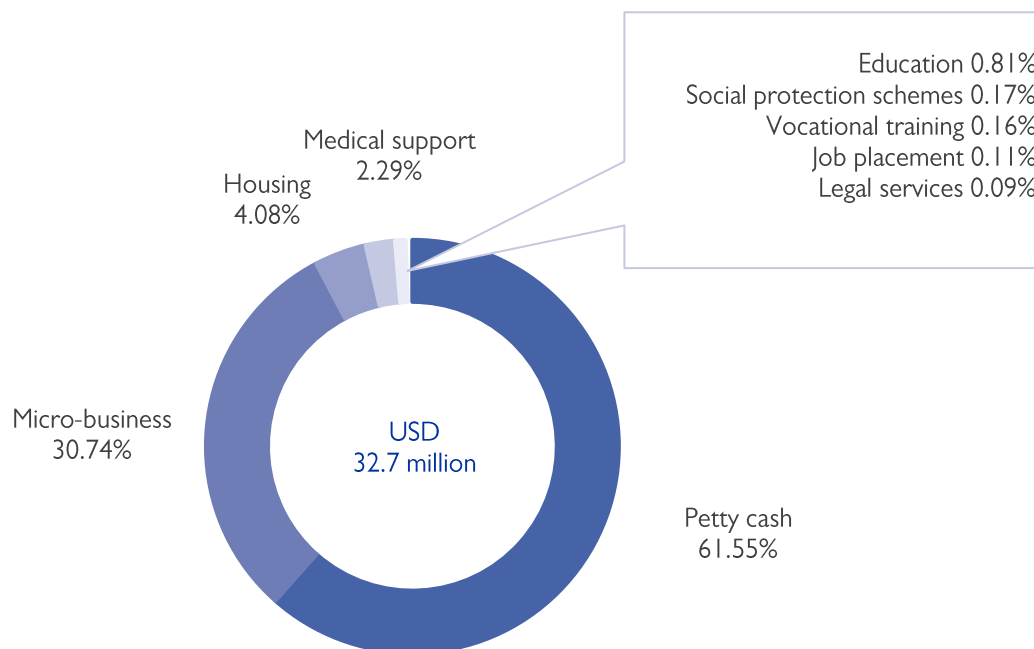

⁶ Hereinafter referred to as "Kosovo/UNSC 1244".

As shown in Chart 5, 61 per cent of these expenditures were provided in cash either upon departure in the host country or after arrival, and about 39 per cent was provided in kind in the country of origin (mostly for setting up micro-businesses and to provide for housing support).

In addition to the support provided to individual returnees, IOM implemented several projects targeting communities of return in countries such as Azerbaijan, Mali, the Gambia, Guinea-Bissau, Nigeria and Senegal, through a diversity of activities including agriculture,

farming, fishing, and livelihood support. Furthermore IOM engaged in a diversity of initiatives aiming at reinforcing local capacities to deliver reintegration-related assistance. In Tunisia for example, IOM participated in consultations with representatives of the Government of Tunisia and civil society to promote the inclusion of reintegration-related provisions in the Anti-Trafficking in Persons Law. In Georgia, IOM has supported the development of a guidebook for service providers in the field of reintegration assistance, in coordination with the Georgian State Commission on Migration Issues and NGO partners.

Chart 5: Estimated financial expenditures per type of support, 2016

1.2. Overview by regions

Host regions

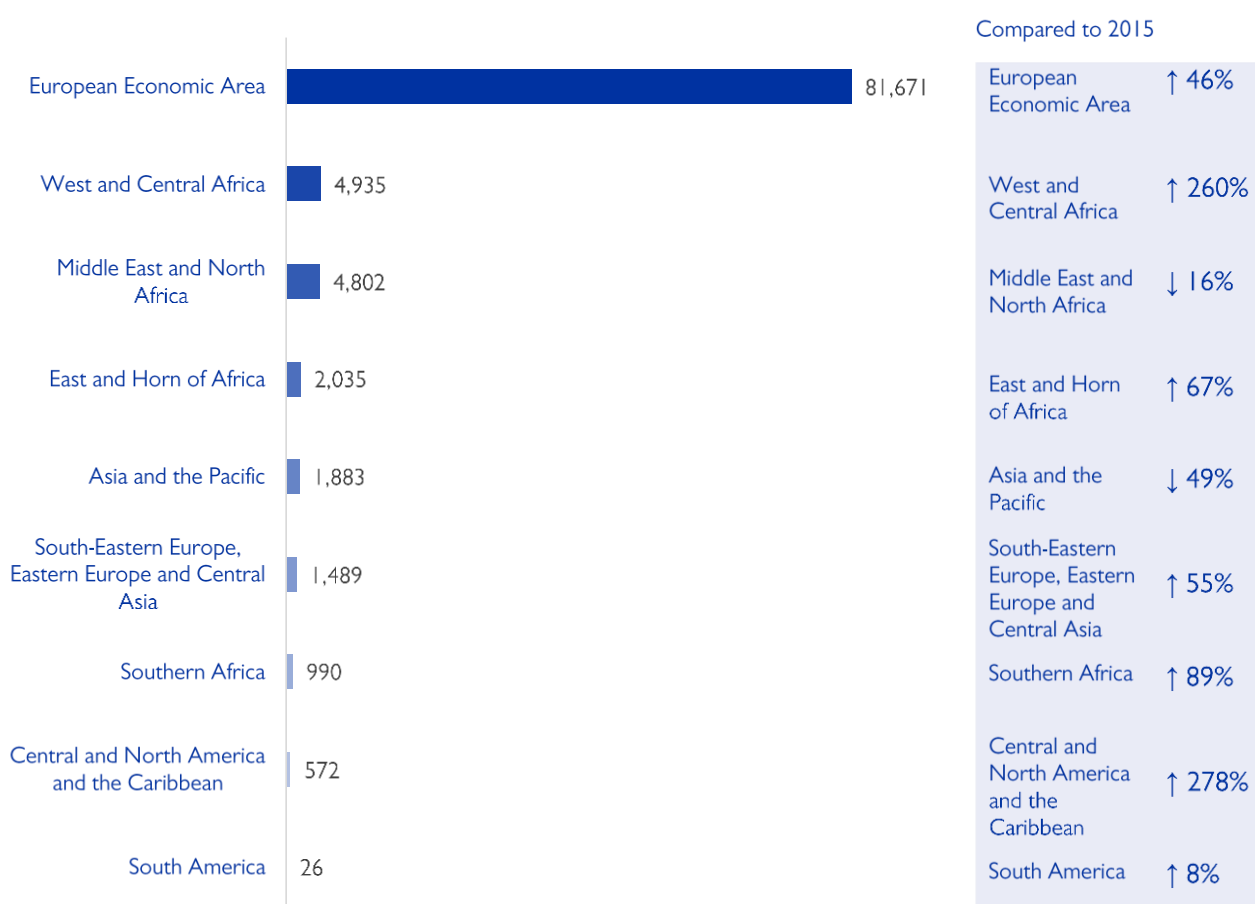

In 2016, 83 per cent of the AVRR beneficiaries returned from the European Economic Area (EEA), which saw a 46 per cent increase in the number of migrants assisted as compared to 2015.⁷

However, the share of AVRR beneficiaries returning from the EEA in 2016 remained relatively stable as compared

to 2015 (where 85% of the beneficiaries returned from the EEA).

Although experiencing an important increase from 1,341 to 4,935 beneficiaries, the number of returns from the West and Central Africa region remained proportionally low compared to the EEA in 2016.

Chart 6: Comparison of returns from host regions between 2016 and 2015

⁷ The level of returns in 2015 has been affected by gaps in the main AVRR funding instrument, the EU Asylum,

Migration and Integration Fund. This applies to all return figures from the EEA for 2015 reflected in this report.

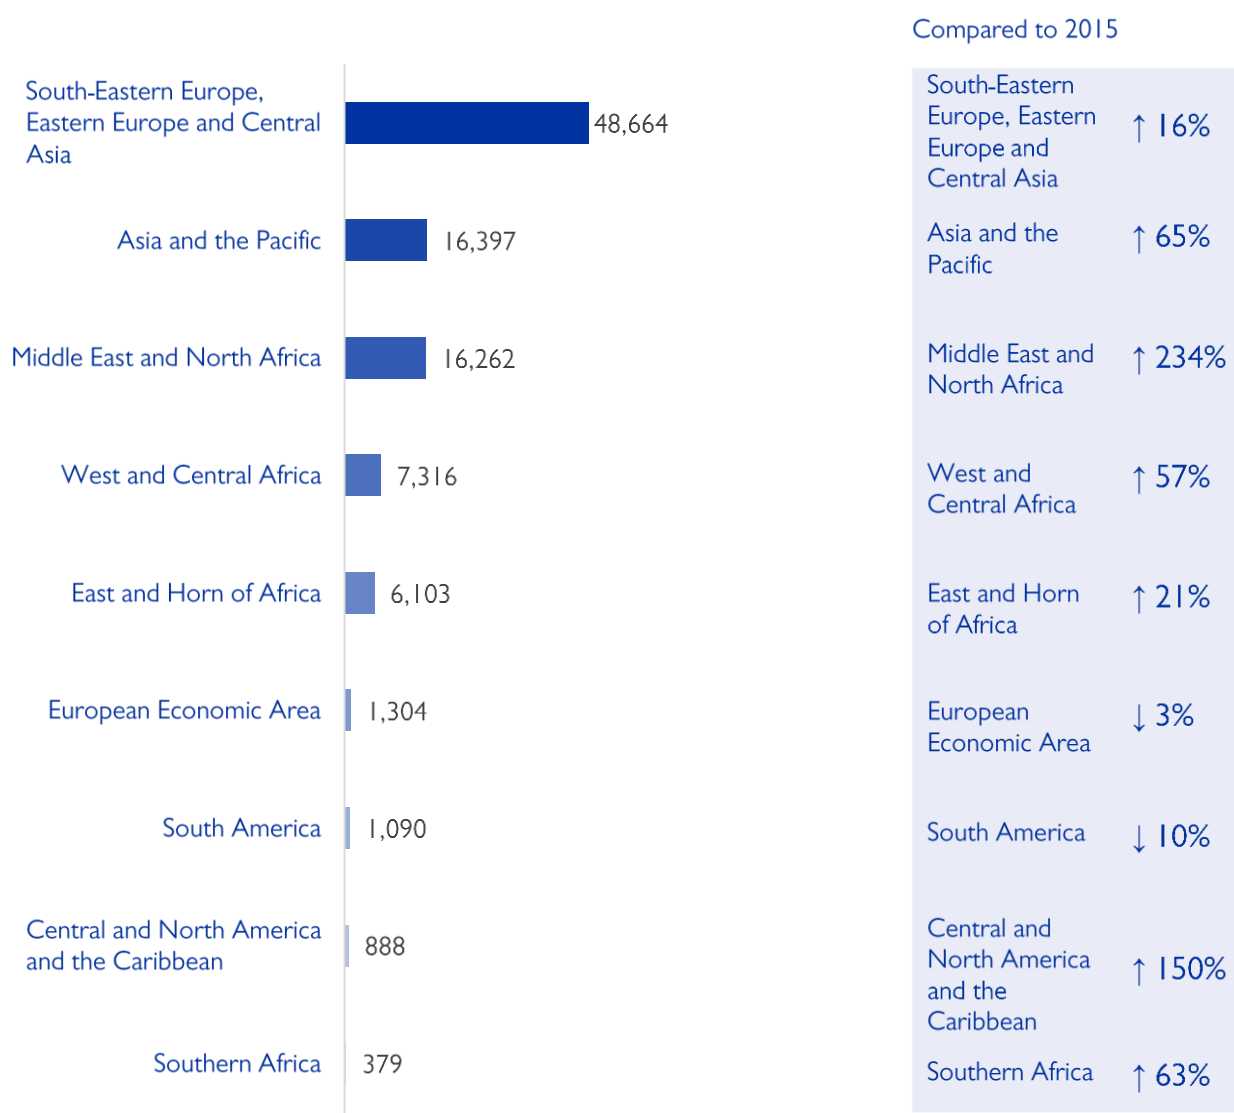

Regions of origin

At the regional level, South-Eastern Europe, Eastern Europe and Central Asia (SEEECA) remained the main region of origin of AVRR beneficiaries (approximately 49% of the total).

As highlighted in Chart 7, among the main changes in comparison with 2015 are the increased volume in the number of returns to the Middle East and North Africa (+234%), the Central and North America and the

Caribbean (+150%), and the Asia and the Pacific (+65%) regions. Returns to the Middle East and North Africa and to the Asia and the Pacific regions each represented a share of approximately 16 per cent in the 2016 total. In comparison with 2015, this proportion remained stable for the Asia and the Pacific region, but augmented significantly for the Middle East and North Africa (which accounted for only 4% of the total in 2015).

Chart 7: Comparison of returns to regions of origin between 2016 and 2015

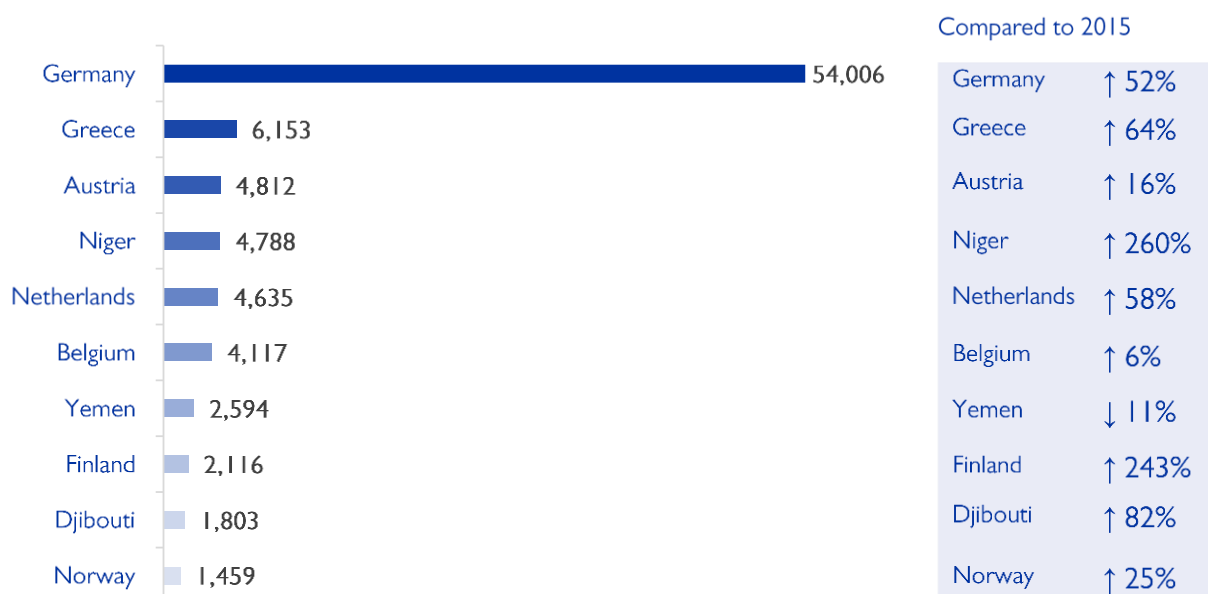

1.3. Overview by countries

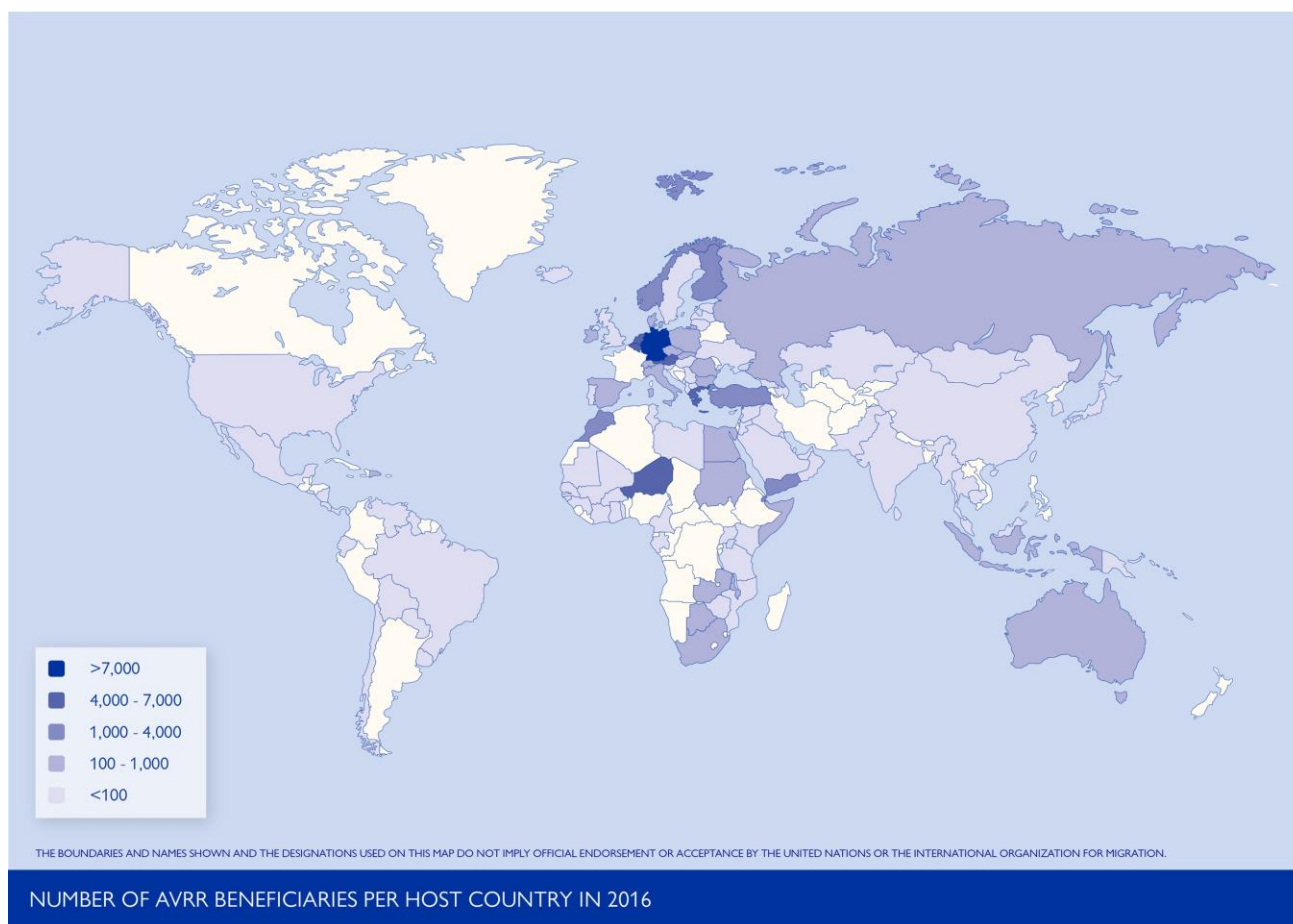

Host countries

Germany remained the host country from which most migrants returned home. Chart 8 shows that 54,006 migrants, which corresponds to more than half of the total, left Germany to return to their country or territory of origin, mainly to Albania (16,381 returns), Serbia (6,138 returns), Iraq (5,657 returns) and Kosovo/UNSC

1244 (5,397 returns). Other countries such as Greece, Niger, Finland and Djibouti experienced a sharp increase in the number of migrants assisted with AVRR in 2016. Moreover, seven out of the top ten countries of origin are from the European Economic Area.

Chart 8: Top 10 host countries for AVRR, 2016

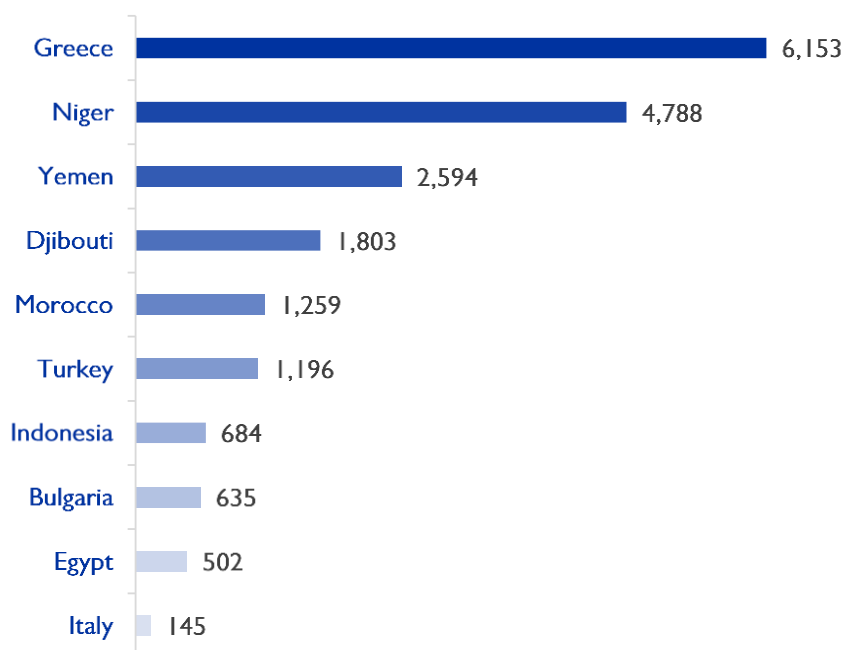

Transit countries

The volume of returns from transit countries remained stable as compared to the previous year, amounting to more than 20 per cent of the total number of returns globally.

Out of the top ten host countries in 2016, four are referred to as transit countries,⁸ namely Greece, Niger, Yemen and Djibouti. With a 64 per cent increase in the number of assisted migrants who transited through the country compared to 2015, Greece remained the main

transit country for AVRR in 2016. As it was the case in 2015, over half of the top ten transit countries were in the MENA region, with the highest number of beneficiaries returning from Niger, which experienced an important increase, from 1,322 migrants assisted in 2015 to 4,788 in 2016. Significant increase was also recorded in Djibouti (from 990 to 1,803) and Turkey (from 419 to 1,196), whereas the number of AVRR beneficiaries returning from Indonesia dropped from 2,168 to 684.⁹

Chart 9: Top 10 transit countries for AVRR, 2016

Compared to 2015

Greece	↑ 64%
Niger	↑ 260%
Yemen	↓ 11%
Djibouti	↑ 82%
Morocco	↓ 10%
Turkey	↑ 185%
Indonesia	↓ 68%
Bulgaria	↑ 613%
Egypt	↑ 13%
Italy	↓ 59%

Countries and territories of origin

Chart 10 shows that AVRR beneficiaries in 2016 mainly returned to Albania and Iraq. Both countries together accounted for about a third of the total in 2016. The chart also highlights the higher share of migrants returning to Afghanistan, with a 402 per cent increase compared to

2015. The number of migrants returning to the Islamic Republic of Iran also saw an important increase but remained relatively low compared to the above-mentioned countries. Moreover, six out of the top ten countries of origin are from the SEECA region.

⁸ In the migratory context, transit countries are usually referred to as countries through which a person or a group of people pass on a journey to the country of destination. Nevertheless, many migrants, especially those migrating irregularly, often cannot continue their journey for a variety of reasons and instead become

stranded in a transit country. In this context, transit and destination countries are not always clearly distinguishable.

⁹ See Chapter 1, Regional highlights, pp. 19–36 for more information.

2. REGIONAL HIGHLIGHTS

2.1. Asia and the Pacific

Asia and the Pacific is a diverse and dynamic region, home to nearly 60 per cent of the world's population, and marked by sustained growth and deepening connectivity. It is also characterized by considerable disparity between and within countries, which helps explain why it has some of the world's largest migration corridors. Given the long and porous land and sea borders, most of the flows occur between countries. Migration routes are also known to extend much further, over land and by sea, to connect non-contiguous States.¹⁰

In 2016, IOM assisted 16,397 migrants to return to the Asia and the Pacific region (the second region of origin for AVRR returnees), mainly from the European Economic Area region, which represents a 65 per cent increase as compared to 2015. However, a decline in the volume of returns from the region was observed in 2016 (1,883 returns in 2016, 3,744 returns in 2015). This can be explained by IOM's increased support in response to the Andaman Sea Crisis, which saw more than 25,000 people fleeing Myanmar and Bangladesh by boat,¹¹ and to the discovery of thousands of trafficked fishers in Eastern Indonesia in 2015.¹² IOM was among the first responders in both situations, providing AVRR support to large

numbers of migrants in need along with humanitarian assistance.

The map on the next page reflects the top three migration flows for the Asia and the Pacific region, both as a host region and as a region of origin. Among the migrants who returned to the region, 84 per cent (13,717 returnees), returned from the EEA; 7 per cent (1,125), returned from the SEECA region; and 8 per cent (1,352) returned within the Asia and the Pacific region. Most migrants returning from Asia and the Pacific countries returned within the same region (72%), while the remaining returned to the MENA region (11%), and to the EEA (6%).

In 2016, IOM continued to provide tailored AVRR support to migrants in vulnerable situations, including victims of trafficking and unaccompanied migrant children. Among the 895 identified victims of trafficking who were assisted with AVRR in 2016, one third returned to the Asia and Pacific region, mainly from the MENA region to Nepal and from Indonesia to Cambodia and Myanmar, the majority of them reporting being victims of forced labour.

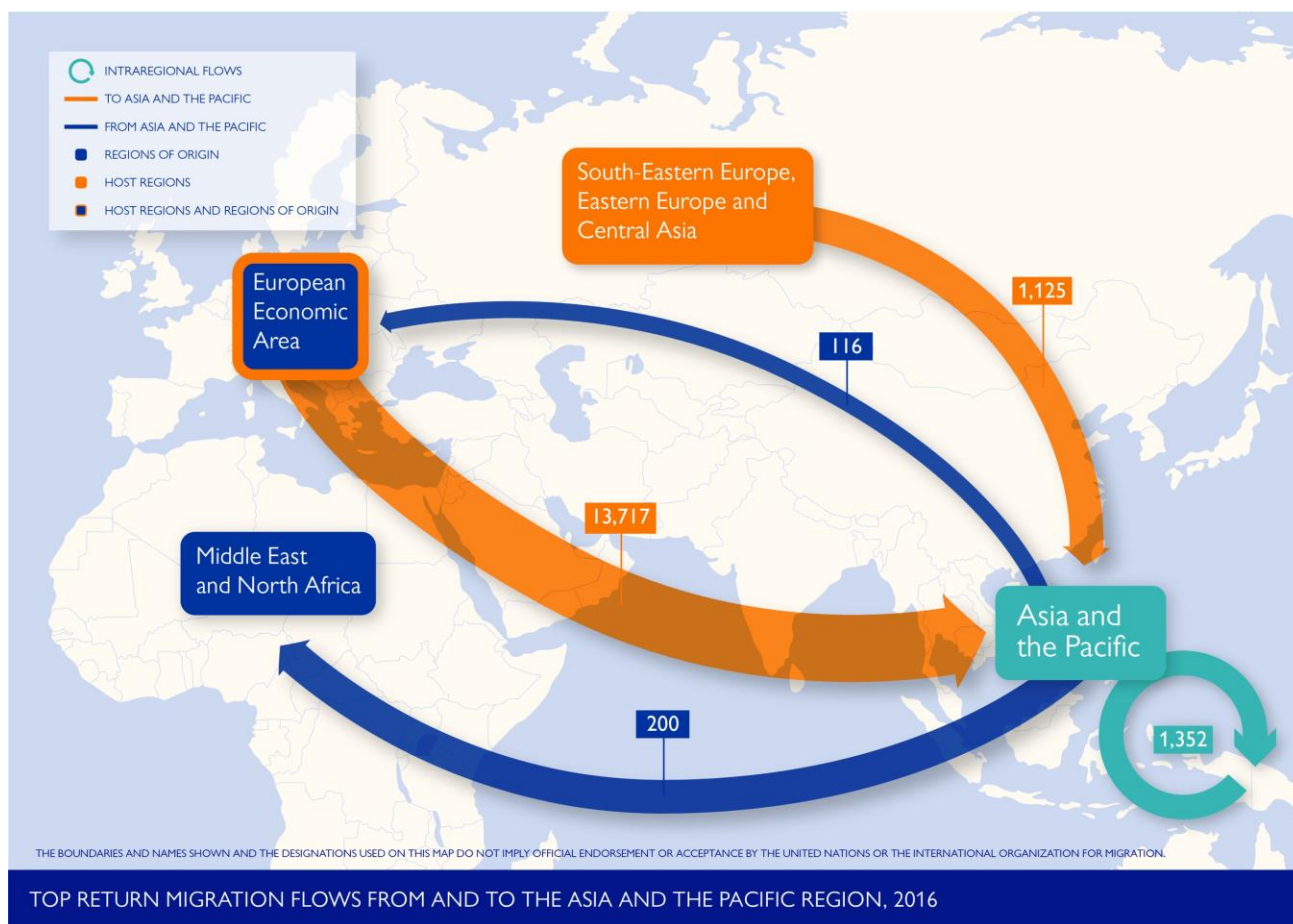

Table 1: Top 5 host countries and countries of origin within the Asia and the Pacific region in 2016/2015, with number of migrants assisted.

Host countries				Countries of origin			
2016		2015		2016		2015	
Australia	963	Indonesia	2,168	Afghanistan	7,102	Pakistan	1,927
Indonesia	684	Australia	819	Iran (Islamic Republic of)	4,485	Bangladesh	1,534
China	64	Thailand	287	Pakistan	1,278	Afghanistan	1,413

2.2. Central and North America and the Caribbean

With less than 10 per cent of the total global population, the Central and North America and the Caribbean region hosts about 25 per cent of all migrants in the world.¹³

In 2016, the Central and North America and the Caribbean region experienced an important increase of returns in comparison to the previous year, both from the region (+278%) and to the region (+150%). Nevertheless, the share of returns from and to the region in the total number of returns remained relatively low in 2016.

The top three return migration flows highlighted in the map on the next page show that 491 returnees (or 55% of the total returns to the region), returned within the

same region, mainly from the Dominican Republic to Haiti (471). This can be explained by the launch of an AVRR component within the project “Reduction of Haitian Migrant Vulnerability in the Dominican Republic via Regularization and Assisted Voluntary Return and Reintegration.”¹⁴ 342 migrants returned from the EEA to the Central and North America and the Caribbean region, which amounts to 39 per cent of the total returns to the region. Another 30 migrants returned from the Asia and Pacific region to the Central and North America and the Caribbean region.

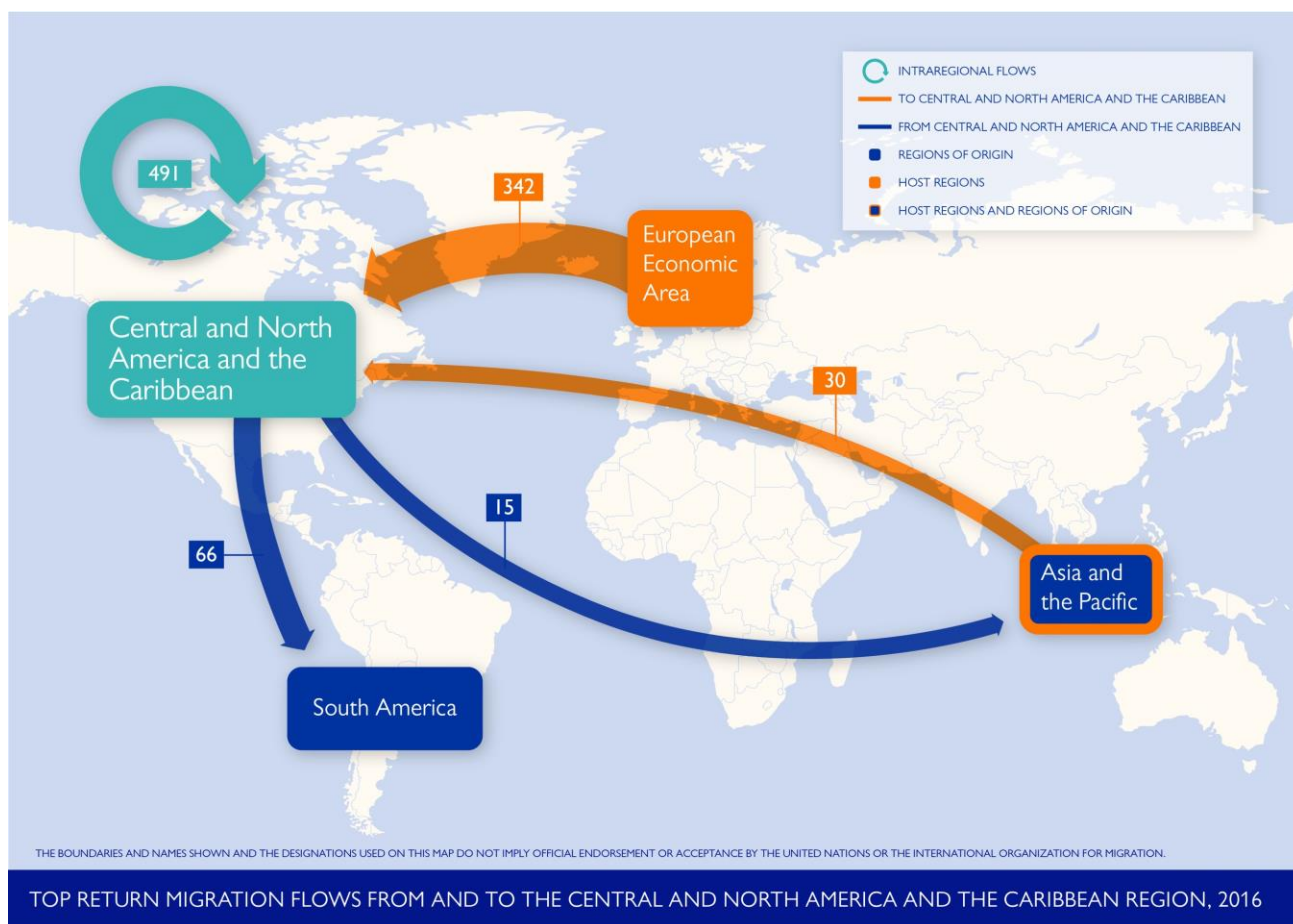

In addition, 66 migrants returned from the Central and North America and the Caribbean region to South America and 15 to the Asia and the Pacific region.

Table 2: Top 5 host countries and countries of origin within the Central and North America and the Caribbean region in 2016/2015, with number of migrants assisted.

2.3. East and Horn of Africa

The number of migrants returning from the East and Horn of Africa region increased sharply in 2016 (+67%). The region also remained a relatively important region of origin for returning beneficiaries (+21%). However, the share of migrants returning to the East and Horn of Africa region remained relatively low (6.2%) in the overall number of returns in 2016.

As shown in the map on the next page, 2,940 AVRR beneficiaries returned to the region from the MENA region. 2,578 of them returned from Yemen to Ethiopia. This represents 48 per cent of the total returns to the region.

In addition, 2,009 migrants returned from countries within the East and Horn of Africa region, mainly from Ethiopia to Djibouti. As such, intraregional return movements represented 33 per cent of the total number of returns to the region.

Another 779 migrants returned from the Southern Africa region, amounting to 13 per cent of the returns to the East and Horn of Africa region.

The East and Horn of Africa region alone received 696 of the 3,143 migrants in vulnerable situations provided with AVRR support in 2016. Among them, 670 unaccompanied migrant children returned to Ethiopia, mainly from Djibouti (371) and Zambia (207).

Table 3: Top 5 host countries and countries of origin within the East and Horn of Africa region in 2016/2015, with number of migrants assisted.

2.4. European Economic Area

In 2016, EEA authorities continued to face increasing mixed migration flows – including refugees, asylum seekers, economic migrants, victims of trafficking (VoTs), unaccompanied migrant children (UMCs), and other categories of migrants.

The political and operational emphasis in the EU remained on the swift implementation of the EU Action Plan on return, adopted and endorsed in 2015. In support to the EU Migration and Home Affairs Policy, the Asylum, Migration and Integration Fund (AMIF) allowed Member States to further develop national programmes and responses. It also contributed to strengthening a European concerted approach to migration management and return in specific countries of origin. The European Migration Network Return Expert Group (REG) became increasingly active over the past year, serving as the platform for the follow-up, planning and monitoring of practical cooperation among the Member States and other relevant stakeholders in the field of return, hence linking policymaking to implementation and operational activities.

In 2016, a total of 81,671 migrants voluntarily returned from the EEA with the support of IOM, which represented more than 83 per cent of the total number of returns. This represented an increase of 46 per cent compared to 2015 for the number of assisted voluntary returns from this region. In comparison with 2015, the number of returns to the EEA region remained relatively

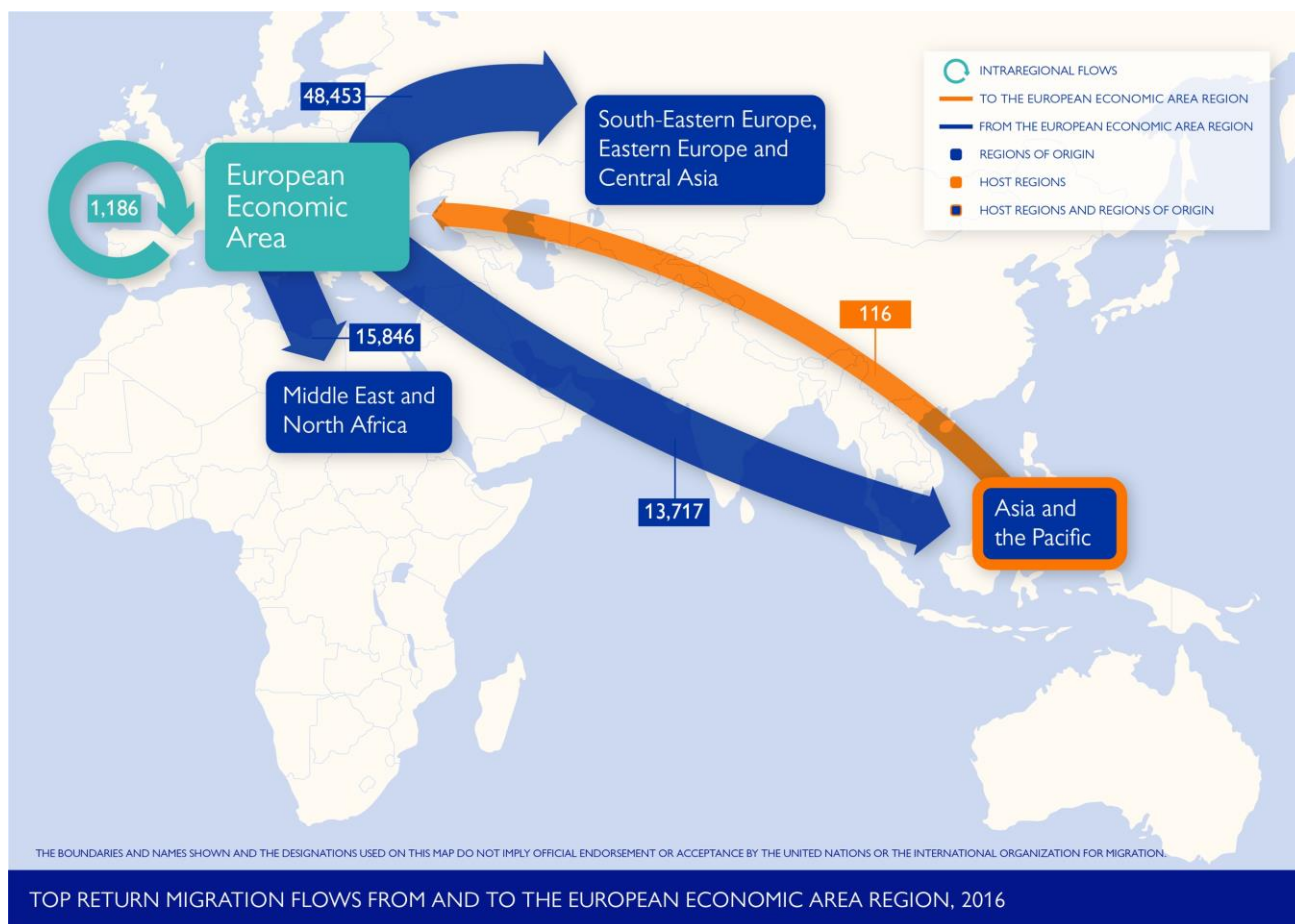

stable and accounted for 1.3 per cent of the total returns in 2016. AVRR beneficiaries mainly returned from Germany (54,006), Greece (6,153), Austria (4,812), the Netherlands (4,635) and Belgium (4,117). Also, IOM assisted some 39,616 beneficiaries from EEA to the Western Balkans mainly to Albania (17,974), Serbia (6,968) and Kosovo/UNSC 1244 (6,002).

The map on the next page highlights the main return flows from the EEA and shows that a total of 48,453 migrants left to the SEECA region, which corresponds to 59 per cent of the total number of returns from the EEA region. Another 15,846 beneficiaries returned from the EEA to the MENA region (among whom 12,718 returned to Iraq) and 13,717 to the Asia and the Pacific region (among whom 6,295 returned to Afghanistan). This map also shows that most of the return flows to the EEA were intraregional with 1,186 migrants mainly returning to Romania and Bulgaria. Furthermore, 116 beneficiaries returned from the Asia and the Pacific region and 2 from the Southern Africa region.

With regards to migrants in vulnerable situations assisted at the global level in 2016, 29 per cent of the UMCs, 78 per cent of the migrants with health-related needs, and 25 per cent of the identified VoTs returned from the EEA. Of the 226 victims of trafficking assisted with AVRR from the EEA, 141 returned within the same region, including 56 to Bulgaria and 40 to Romania.

Table 4: Top 5 host countries and countries of origin within the European Economic Area region in 2016/2015, with number of migrants assisted

Host countries				Countries of origin			
2016		2015		2016		2015

Belgium	4,117	Netherlands	2,972	Italy	36	Croatia	39

2.5. Middle East and North Africa

As in 2015, over half of the top ten transit countries in 2016 belonged to the MENA region.

A total of 16,262 migrants returned to the region, which corresponds to a considerable increase of 234 per cent compared to 2015. The share of the MENA region as a region of origin consequently reached 16.5 per cent in 2016, while it represented 6 per cent of the total returns in 2015.¹⁵

As highlighted in the map on the next page, 15,846 AVRR beneficiaries returned to the region from the EEA, which constituted 98 per cent of the total returns to the MENA region in 2016. Moreover, 79 per cent of returnees from

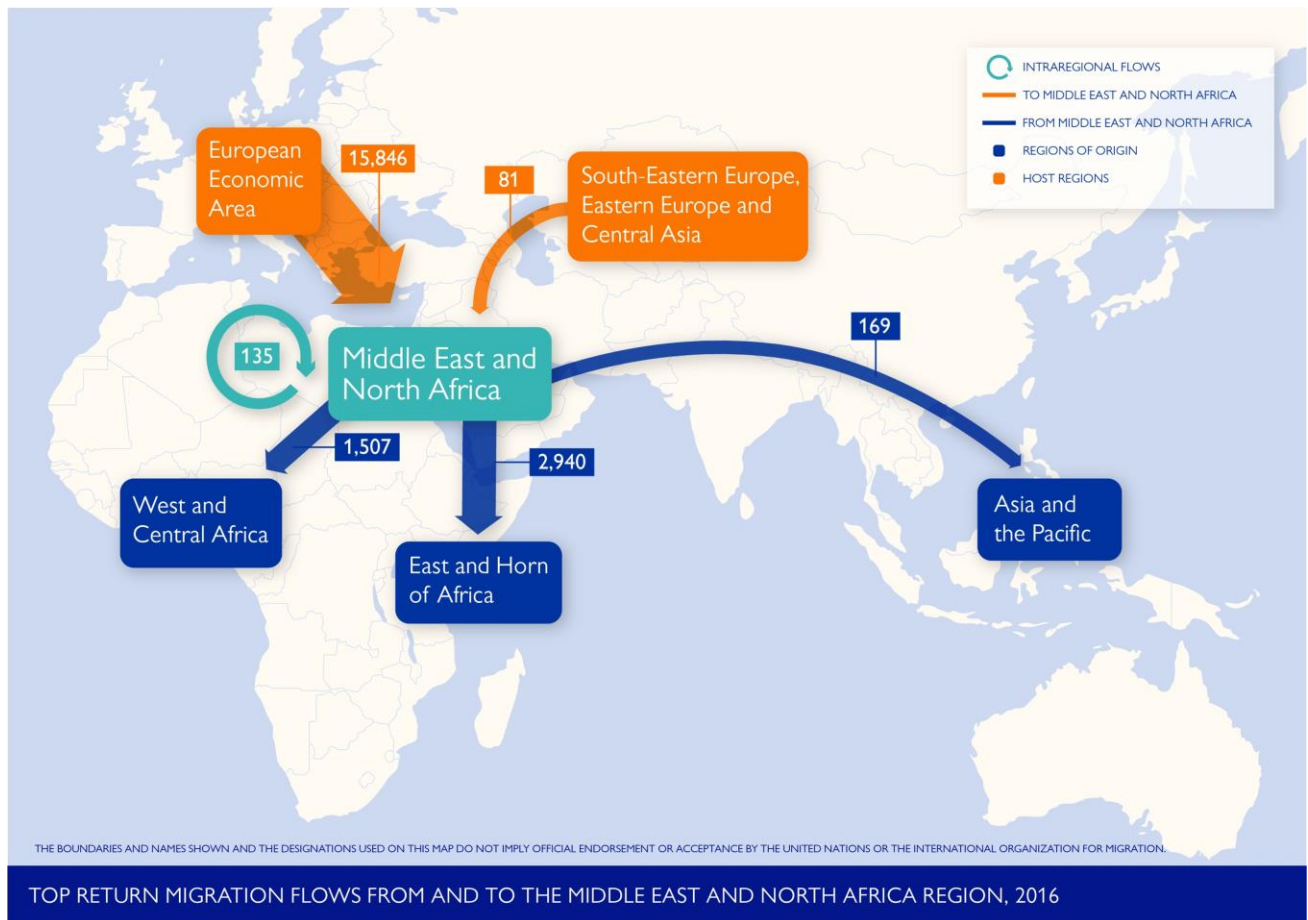

the EEA returned to Iraq, among whom 45 per cent returned from Germany only. With regards to the outflows, 2,940 beneficiaries (61%) returned to the East and Horn of Africa region, including 2,578 from Yemen to Ethiopia. Another 1,507 (31%) returned to the West and Central Africa region, more specifically to Guinea, Cameroon and Côte d'Ivoire.

Finally, the MENA region saw the return of about 8 per cent of the total migrants in vulnerable situations provided with AVRR support in 2016. Most of them were UMCs as well as migrants with health-related needs returning to Iraq.

Table 5: Top 5 host countries and countries of origin within the Middle East and North Africa region in 2016/2015, with number of migrants assisted

Saudi Arabia	79	Egypt	406	Sudan	231	Lebanon	172

¹⁵ These figures do not include voluntary humanitarian returns implemented by IOM from Libya.

2.6. South America

In 2016, the share of returns from and to South America in the overall return numbers (both as a host region and as a region of origin) remained relatively low, as in 2015. In total, 26 migrants returned from South America, while 888 beneficiaries returned to the region, accounting respectively for 0.1 per cent and 1.1 per cent of the total in 2016.

As shown in the map on the next page, migrants returning to South America mostly returned from the EEA (965

migrants, which corresponds to 89% of the total inflows). More than half of AVRR beneficiaries from the EEA region returned to Brazil.

In addition, 66 migrants returned from the Central and North America and the Caribbean region to South America, and 47 from the Asia and the Pacific region. As shown in the map, returns from the South America region remained relatively low.

Table 6: Top 5 host countries and countries of origin within the South America region in 2016/2015, with number of migrants assisted.

2.7. South–Eastern Europe, Eastern Europe and Central Asia

Significant mixed and complex migration flows run through the SEECA region. Migrants from, and those transiting through the region are often desperate to reach their intended destination, and in the absence of available legal migration routes, are particularly vulnerable to the crimes of trafficking in human beings, migrant smuggling and exploitation. Consequently, a wide range of people on the move need special protection, assistance and a comprehensive migration management response.

As in 2015, the SEECA region remained the first region of origin for AVRR beneficiaries in 2016. 48,664 migrants returned to the region, which corresponds to 49 per cent of the total number of returns in 2016. This represents a 16 per cent increase in the number of returns to this region as compared to 2015. In addition, returns from the SEECA region increased by 55 per cent in 2016. That being said, the share of returns from the SEECA region in the total number of returns in 2016 remained relatively low (1.5%).

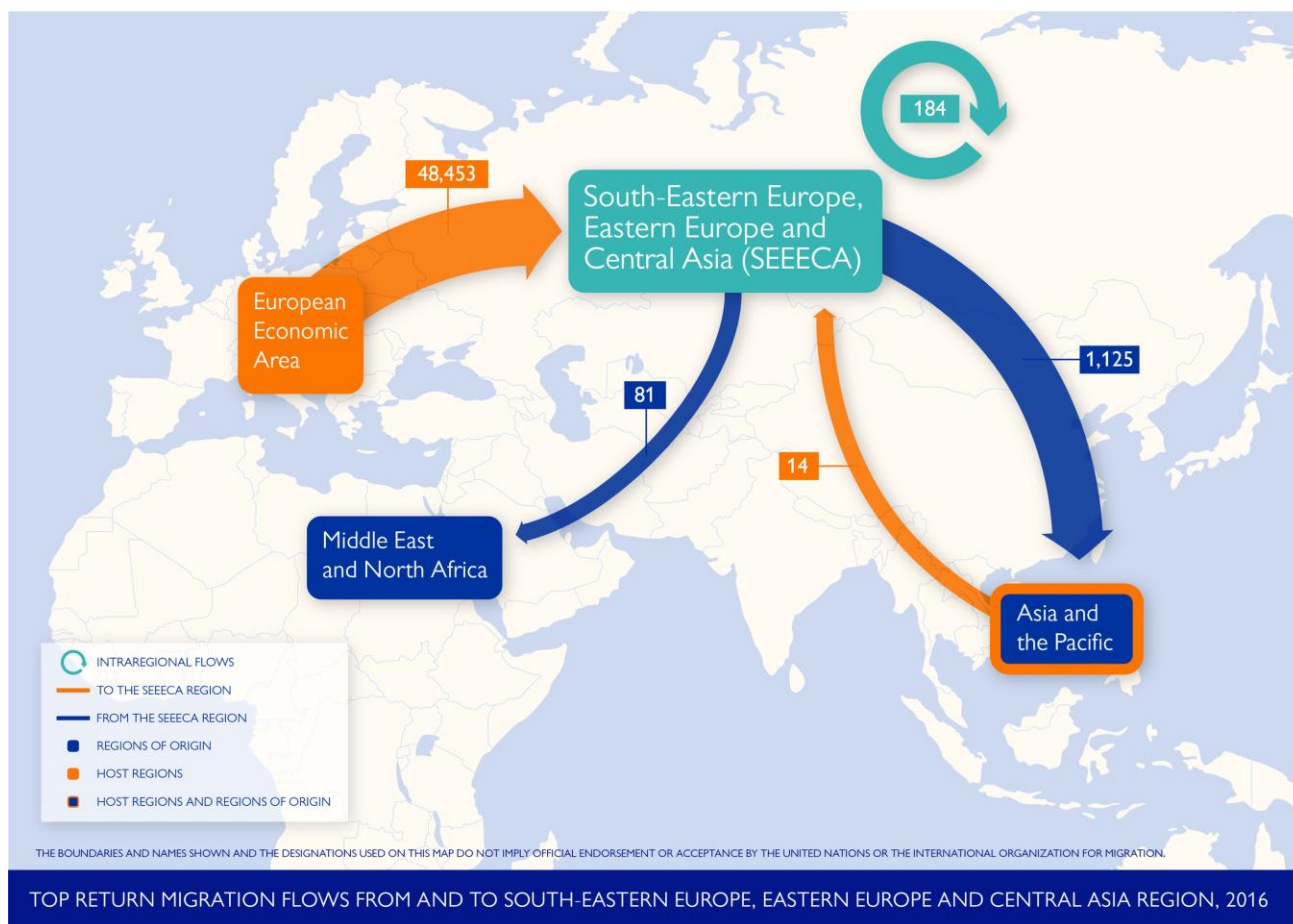

While most countries in the region are traditionally countries of origin for migrants, some countries in the region (mainly in the Balkans) are increasingly becoming host/transit countries.

As shown in the map on the next page, 48,453 of all returning migrants to the SEECA region departed from the EEA. This represents close to 99 per cent of the total number of returns to the SEECA region. Among migrants returning from the EEA to the SEECA region, 17,975 returned to Albania (with 90 per cent of the latter returning from Germany). Another 6,978 returned to Serbia and 5,889 to Kosovo/UNSC 1244, among whom respectively 87 per cent and 91 per cent also returned from Germany. In addition, 14 beneficiaries returned from and 1,125 returned to the Asia and Pacific region, including 799 who returned from Turkey to Afghanistan and 246 from Turkey to Pakistan. Half of the 81 returnees to the MENA region returned to Iraq.

Out of the 3,143 migrants in vulnerable situations assisted in 2016, 662 returned from the EEA to the SEECA region. Among them were 88 UMCs, mainly returning to Albania; 162 VoTs mainly returning to Montenegro, the Republic of Moldova, Ukraine and Uzbekistan; and 412 migrants with health-related needs mainly returning to the Russian Federation, Serbia and Georgia.

Table 7: Top 5 host countries and countries of origin within the South–Eastern Europe, Eastern Europe and Central Asia region in 2016/2015, with number of migrants assisted

The former Yugoslav Republic of Macedonia	32	Ukraine	12	Ukraine	3,438	Ukraine	2,210

2.8. Southern Africa

In 2016, the Southern Africa region saw an important increase in the number of returns both as a host region and as a region of origin. However, as in 2015, the share of returns from and to the Southern Africa region in the overall number of returns remained relatively low (less than one per cent, both as a host region and as a region of origin).

A total of 990 migrants returned from the Southern Africa region in 2016, which corresponded to a 89 per cent increase as compared to 2015. As highlighted in the map on the next page, more than 17 per cent of these returns (177) took place at the intraregional level (in comparison, they represented seven per cent of the returns from the region in 2015), mainly from South Africa to the Democratic Republic of the Congo (85

returns), Malawi (43 returns) and Zimbabwe (26 returns). Another 104 migrants returned from the EEA mainly to Angola and the Democratic Republic of the Congo.

60 out of these 177 returnees within the Southern Africa region were unaccompanied migrant children. Most of them returned from South Africa to Malawi (30 returns) and Zimbabwe (19 returns).

In addition, 779 migrants returned to the East and Horn of Africa region, in great majority to Ethiopia (735). 405 of the returnees to Ethiopia departed from Malawi and 300 from Zambia. Out of the 24 migrants who returned to the West and Central Africa region, 22 left from South Africa to Ghana.

Table 8: Top 5 host countries and countries of origin within the Southern Africa region in 2016/2015, with number of migrants assisted

2.9. West and Central Africa

Migration is a driving force for the West and Central Africa region (WCA). It is deeply rooted in the culture and history of its populations and has always been a major factor for human and economic development. Its potential positive impact on socioeconomic development of both host countries and countries of origin led to the establishment of free movement within the Economic Community of West African States (ECOWAS). Nevertheless, irregular migration from sub-Saharan Africa towards Europe has substantially increased along the Central Mediterranean route. From West Africa, the main migration routes currently transit through Niger with many migrants then crossing the border with Libya and Algeria and eventually trying to reach Europe.

WCA experienced a very important increase in the number of AVRR beneficiaries returning from (+260%) and to the region (+57%) as compared to 2015. In total, 4,935 migrants assisted with AVRR departed from the region and 7,316 returned to it. In 2016, the share of WCA in the total number of returns was 5 per cent as a host region and 7.4 per cent as a region of origin.

As highlighted in the map on the next page, WCA is characterized by a very high prevalence of intraregional flows (99.6% of the returns from WCA took place within the region). Out of the 4,916 beneficiaries who returned within the same region, nearly 97 per cent returned from Niger to Senegal (1,303 returns), Guinea (1,138 returns), Guinea-Bissau (425 returns), and the Gambia (391 returns). Moreover, 1,507 beneficiaries returned to the WCA region from the MENA region, mainly from Morocco to Guinea (596 returns), Cameroon (201 returns), Côte d'Ivoire (166 returns) and Senegal (105 returns). Regarding returns from the EEA, Nigeria alone accounted for 262 returns.

Return of migrants in vulnerable situations is another relevant feature of the WCA region: 399 beneficiaries in vulnerable situations returned home within the region. This included: 135 UMCs mainly returning from Niger to Guinea (25 returns), from South Africa to Ghana (22 returns) and from Ghana to Liberia (25 returns); 149 VoTs mainly from the Russian Federation (26 returns) and Niger (18 returns) to Nigeria; 16 migrants with health-related needs from Tunisia to Côte d'Ivoire.

Table 9: Top 5 host countries and countries of origin within the West and Central Africa region in 2016/2015, with number of migrants assisted

CHAPTER 2 – THEMATIC HIGHLIGHTS

The following sections of the 2016 Key Highlights intend to further illustrate facts and figures presented in the first part of this report. These thematic highlights do not aim to encompass the full complexity and diversity of AVRR. Rather, their objective is to provide the reader with a picture of why and how AVRR projects have been implemented across the globe in 2016 from both the policy and the operational perspectives. The following themes are highlighted in this chapter:

AVRR from transit countries – Increasingly, AVRR support is provided from countries of transit. In 2016, AVRR from these countries amounted to more than 20 per cent of the total number of returns globally. In Niger for example, IOM continued implementing the Migrant Resource and Response Mechanism (MRRM) and deployed staff to assist migrants with basic protection and with AVRR support. In 2016, AVRR was also a key support mechanism provided by IOM to migrants returning from transit countries such as Bulgaria, Greece and Indonesia.

Assisting migrants in vulnerable situations – Various mechanisms and partnerships have been established by IOM to assist migrants in vulnerable situations. In 2016, for example, IOM France launched the TACT platform and developed a Transnational Referral Mechanism for victims of trafficking. IOM offices in Malawi and Ethiopia, in partnership with governments, international and non-governmental organizations assisted a group of detained UMCs to return from Malawi and reunite with their families.

Dialogue and partnerships – Dialogue and partnerships between all stakeholders engaged in return migration are key to effectively respond to the plight of migrants, as well as to broader migratory challenges at the policy level. In

2016, IOM Morocco concluded a partnership with the *Institut Supérieur de l'Information et de la Communication*,¹⁶ with the aim to foster a better understanding among future journalists and to promote a positive narrative on migration-related issues and on migrants themselves. At the policy level, the Regional Conference on Migration adopted a “Manual for the Drafting of National Reintegration Policies”, while the Migration Dialogue for Southern Africa developed an operational guidance package, including Standard Operating Procedures (SOPs) and profiling tools to facilitate the implementation of AVRR activities.

Research and evidence-based programming – Research and evidence-based programming are key to enhancing the quality and the impact of the assistance delivered. From within the great diversity of research and studies published by IOM in 2016, this chapter will feature two reports published by IOM Bern and by the IOM Subregional Coordination Office for Central Asia, which explored, respectively, access to microcredit for returning migrants, and opportunities for migrants vulnerabilities and integration needs in Central Asia.

What migrants say – Equally important is the need to give voice to migrants who have returned, allowing them to provide both the general public and AVRR stakeholders with a realistic insight on the return process from their own perspective. This chapter will present stories of returnees who sought IOM's assistance to return to Nepal after suffering from labour exploitation in Sudan, as well as the story of Leonardo Latoja, a Chilean migrant who was assisted to return voluntarily and reintegrate in his country of origin, after 16 years spent in Switzerland.

¹⁶ *Higher Institute of Information and Communication*.

I. AVRR FROM TRANSIT COUNTRIES

A migrant at an IOM transit centre in Niger.

As global migration routes grow in complexity, many migrants worldwide become unable to continue their journey to their intended destination and, unable or unwilling to regularize their status in the country of transit, they are stranded, often with limited access to basic assistance and protection.

Around the world, migrants in transit are often found in vulnerable situations and are dependent on smugglers for

precarious travel arrangements. In some countries, they may even fall victim to human trafficking, exploitation or extortion.

In this context, stranded migrants willing to return to their country of origin may lack the financial resources and/or the necessary travel documents that would allow them to do so. In these cases, AVRR represents a viable, dignified and humane option to respond to their plight.

IOM transit centres in Niger

Niger is a key transit country in the West and Central Africa region. In addition to the provision of immediate protection assistance, migrants hosted in the five IOM transit centres throughout the country are supported in the preparation and the implementation of their return and reintegration process in their country of origin.

German Chancellor Angela Merkel listens to migrants talk about their migration stories at IOM's transit centre in Niamey, Niger, on 10 October 2016. © IOM/Monica Chiriac.

Niger is mainly known as a transit country for migratory flows from West Africa towards Libya and Algeria, and for some, further to the Mediterranean. Between February and December 2016, IOM observed over 400,000 people transiting through Niger towards (mainly) Libya and Algeria. In this context, IOM set up a Migrant Resource and Response Mechanism (MRRM)¹⁷ with the aim to support Niger in promoting viable alternatives to irregular migration, informing individuals about safe migration and encouraging activities that ensure that migrants can actively contribute to the economies in their countries of origin.

Transit centres are key components of IOM's MRRM. A transit centre is a reception facility where migrants who opted for AVRR programmes are hosted while their

return travel is organized. In Niger, IOM runs five open-type transit centres with the capacity to host a total of 1,650 migrants. Transit centres are open, therefore migrants can leave at any time. All migrants arriving at the centres are registered, interviewed and counselled by IOM staff. In the centres, migrants are provided with basic protection assistance: food, water, shelter and medical assistance.

The stay in the centres generally lasts for one to two weeks. Within this time, and with the support of IOM, migrants finalize their return plans, contact their family, ensure the obtention of travel documents, and receive tickets for the return transportation back home.

Additionally, IOM tailors its assistance to the specific needs of migrants in vulnerable situations, providing

by the German Cooperation and the Governments of the Netherlands and France.

¹⁷ The Migrant Resource and Response Mechanism in Niger is funded by the European Union and co-funded

psychosocial support and referral mechanisms for victims of trafficking for instance. Some centres also provide short professional trainings to migrants who wish to acquire additional skills before returning home.

In 2016, approximately 15,000 migrants registered in IOM Niger's centres in 2016 and 4,788 were provided with AVRR support to return to their countries of origin.¹⁸

In addition to individualized reintegration support, IOM Niger has implemented community-based reintegration

projects in key countries of origin to strengthen the sustainability of the reintegration process. By the end of 2016, a total of 77 projects had been set up in Senegal, Guinea, Nigeria, Mali and Guinea-Bissau with over 875 direct beneficiaries including community members, migrants and potential migrants. The projects covered joint community activities in the areas of agriculture, fishery, transportation, trade, and others.

In spotlight: transit migration in Bulgaria and Greece

Bulgaria and Greece are among the main entry points to the European Union. IOM Bulgaria and IOM Greece have scaled-up their awareness-raising activities to provide stranded migrants, who may be willing to return to their countries of origin, with accurate and up-to-date information on AVRR schemes.

Stranded in Bulgaria – Located in the South-Eastern corner of the European Union, Bulgaria is one of the gates into Europe along the Balkan and the East Mediterranean migration routes. Prior to 2013, the country was not a preferred entry or transit destination for migrants. Since June 2013, however, it became a key transit country for refugees and migrants seeking to reach West and Northern Europe. IOM reported that in 2016, 18,844 undocumented migrants have been identified in the country, and 14,310 were identified when trying to exit the country, suggesting that most of the migrants are in transit and do not consider Bulgaria as their country of destination.

Nevertheless, many migrants remain stranded in Bulgaria or in Balkan countries for months. In this situation, an increasing number of migrants choose to return to their country of origin, and subsequently request IOM's assistance in facilitating the process. In 2016, 635 migrants were assisted by IOM Bulgaria, which represents a sharp increase from the 89 migrants assisted in 2015.

Stranded in Greece – IOM estimates that 176,906 migrants arrived in Greece in 2016. Many were seeking international protection, reunification with family members, or economic opportunities in Europe. IOM was present at the arrival points and provided legal assistance to migrants arriving by sea, monitored the conditions in reception centres and supported the authorities in the identification of migrants in vulnerable situations. However, due to this large influx, the reception capacities in the country were stretched beyond capacity and many migrants found themselves stranded and destitute. As of 29 December 2016, IOM estimated that over 62,000 were stranded in Greece.¹⁹ Within the same year, 6,153 migrants chose to return from Greece to their countries of origin through IOM Greece AVRR programmes.²⁰

IOM Bulgaria and IOM Greece have deployed staff at key entry and exit points to inform migrants about AVRR schemes. Those who wished to return voluntarily were provided with pre-departure counselling, assistance to obtain appropriate travel documents, purchase of flight tickets, travel assistance, and reintegration support.

¹⁸ Migrants are at will to leave the transit centres at any time, therefore, some migrants left the centre before the return component of the assistance was delivered. This explains the discrepancy between the number of registered migrants and those that benefitted from AVRR.

¹⁹ See www.migration.iom.int/docs/2016_Flows_to_Europe_Oview.pdf.

²⁰ IOM Greece AVRR programmes are primarily funded (75%) by the EU Asylum, Migration and Integration Fund (AMIF) and by the Hellenic Ministry of Interior (25%).

Migrants at a transit camp at the Greek border.

Assisting irregular migrants in Indonesia

Indonesia is the main transit country in the Asia and the Pacific region. Over the past 16 years, IOM has provided direct assistance and AVRR support to over 33,000 migrants in irregular situation in the country, within the framework of the Regional Cooperation Arrangement (RCA).

Every year, thousands of migrants, mostly originating from conflict-affected countries, are found transiting through Indonesia on their way to other countries, mostly to Australia. These migrants often face difficult situations, risking being intercepted or having to pay considerable amounts of money to smugglers, or even falling victims of abusive treatment and/or trafficking. Every year, hundreds of others are found dead after attempting the dangerous journey by boat to and from Indonesia.

To respond to these challenges, IOM has built on its close working relationship with government partners, non-governmental organizations, civil society and local communities to support national and regional capacity-

building efforts and to provide direct assistance to migrants in need. The Regional Cooperation Arrangement (RCA) is a mechanism through which the Australian Government and IOM support the Government of Indonesia in addressing trafficking, smuggling and irregular migration across the archipelago. Activities undertaken under the RCA aim at providing support to migrants in irregular situation, and to enable those who signal a possible need of protection to have access to a refugee determination process through the UN High Commissioner for Refugees (UNHCR). From its inception in 2000 until the end of 2016, IOM has assisted over 33,000 irregular migrants within the framework of the RCA.

2. ASSISTING MIGRANTS IN VULNERABLE SITUATIONS

With limited legal avenues for migration, migrants may turn to irregular and unsafe routes, often with the help of smugglers who may deceive them about costs, risks, transportation methods, routes, and conditions of travel. In many instances, migrants are subject to abuse, exploitation, discrimination, and other human rights violations. These dangers are evidenced by the 7,495 reported deaths of migrants in 2016.²¹

AVRR represents a viable and humanitarian solution for migrants in vulnerable situations, who find themselves stranded or destitute in countries they do not wish to remain in. In these cases, the provision of a tailored assistance based on their specific needs before, during, and after return is essential.

TACT: a model of transnational referral mechanism for victims of trafficking

Launched by IOM France in 2016, the TACT Transnational Referral Mechanism platform has been designed to help host countries and countries of origin to concretely link the different existing National Referral Mechanisms at a transnational level.

In 2016, IOM France launched an online platform (www.iomfrance.org/tact) displaying a Transnational Referral Mechanism (TRM) model for VoTs, developed in the framework of the EU-funded TACT Project. A TRM is an operational framework linking the different stakeholders from two or more countries involved in

identification, referral, assistance, return, and reintegration monitoring of victims of trafficking. A TRM defines clear roles for each stakeholder, along with procedures to follow, to ensure protection of the victims' human rights at every step of the assistance provision, including during their return and reintegration process.

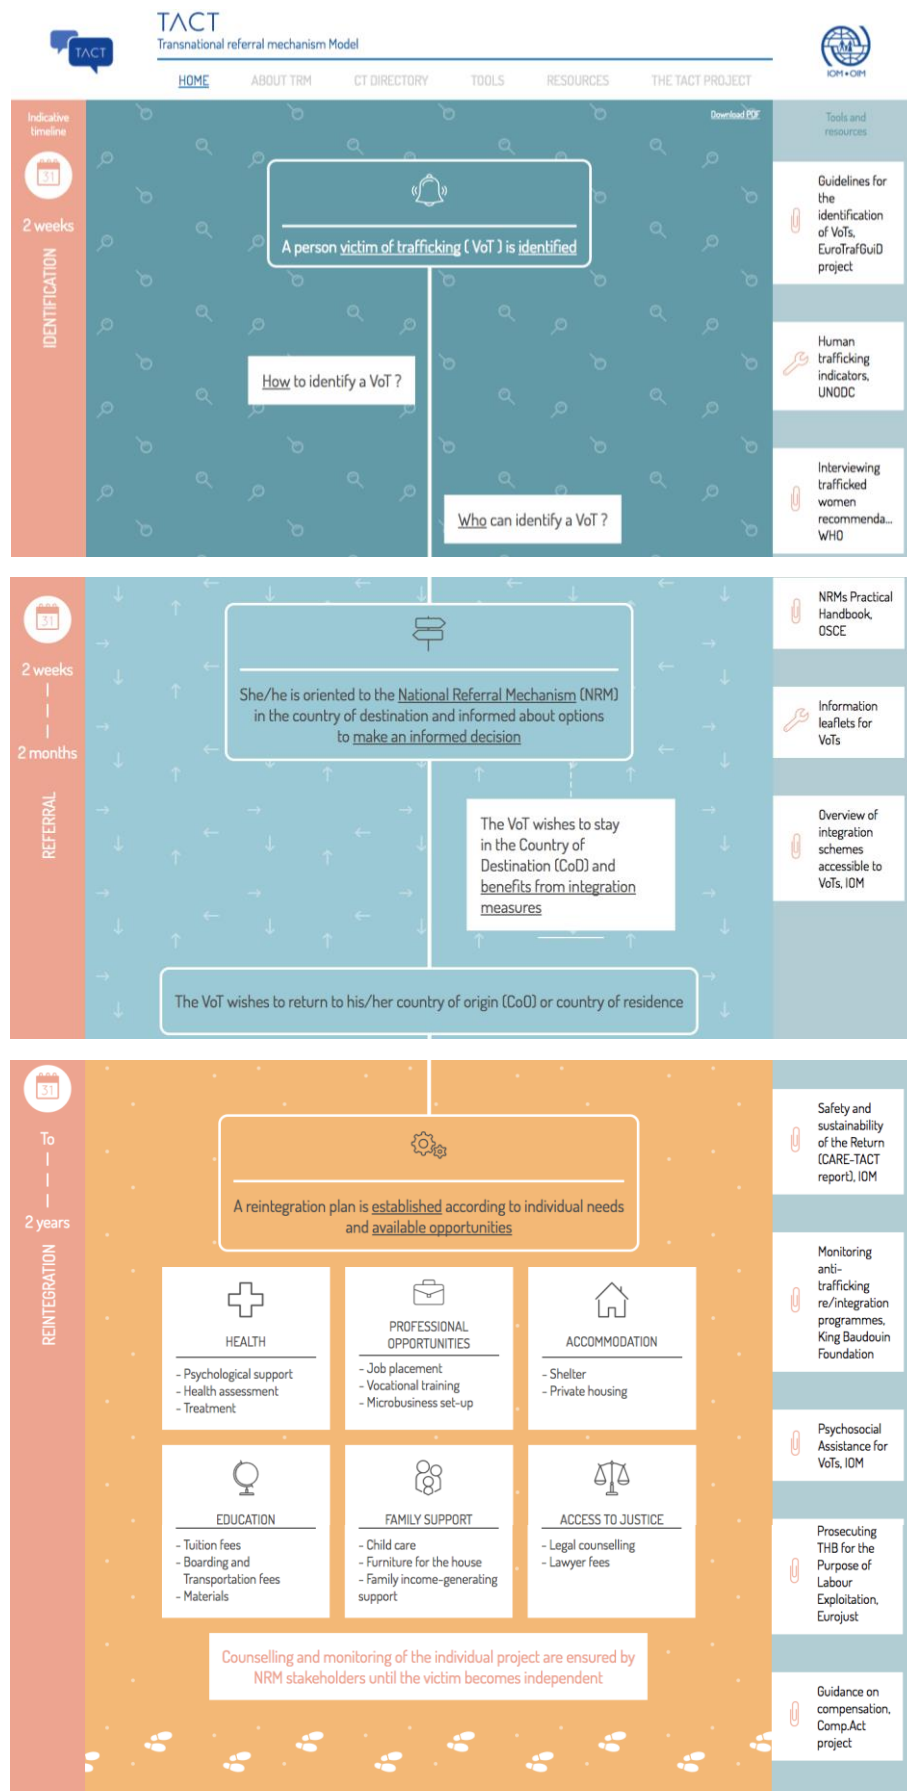

The TACT project, funded by the EU Asylum, Migration and Integration Fund and managed by IOM Paris, has been implemented from May 2015 to October 2016.

The TACT project contributed to the improvement of the safe return and reintegration conditions of victims of trafficking returning from France, Greece, Italy, Poland and Spain to 3 countries: Albania, Morocco and Ukraine, which were defined as priority countries by the European Union and the Member States in the Action Oriented Paper, adopted in 2009. The TACT project built upon previously acquired expertise, in particular by further developing the CARE project approach, which focused primarily on developing a coordinated approach to reintegration of VoTs returning to their countries of origin among key EU Member States and on providing reintegration assistance to any VoT returning to a third country.

In total, 80 victims of trafficking received direct assistance under the CARE and TACT projects, allowing testing and refining the Standard Operating Procedures for the return and reintegration of VoTs.

The TACT TRM platform, designed for counter-trafficking practitioners, was therefore created to help host countries and countries of origin to concretely link the different existing National Referral Mechanisms (NRM) at a transnational level. The platform is composed of four main elements:

- The **Standard Operating Procedures for the Return and Reintegration** of victims of trafficking, which have been mapped out to better show how the process goes as well as the safeguards to be put in place at each level to guarantee victims' fundamental rights;
- The **Counter-Trafficking Directory** for embassies and consular staff, whom have been identified as key stakeholders within the TRM, by acting as pivots between host countries and countries of origin. The Counter Trafficking Directory gathers basic information on more than 50 countries (key facts and figures, assistance available in the host country, assistance for voluntary return to the country of origin, and national emergency hotlines);
- The **resources database**, which contains more than 60 documents covering a broad range of thematic areas related to the direct assistance to VoTs;
- The **tools** tab, which contains eight practical tools that can be used by practitioners when identifying, referring, and assisting victims of trafficking in the framework of a TRM.

Reuniting families with Ethiopian unaccompanied migrant children detained in Malawi

Over the past years, IOM has been providing vital assistance to unaccompanied migrant children wishing to reunite with their families in their countries of origin. In September 2016, for example, IOM facilitated the voluntary return of 53 Ethiopian UMCs detained in Malawi and reunified them with their families in Ethiopia.

A migrant child reunited with his mother in Ethiopia.

Assisting the voluntary return and family reunification of unaccompanied migrant children can be a complex undertaking for all stakeholders involved in the process of return, as these children are particularly vulnerable and require specific care and safeguards. In this regard, the principle of the best interest of the child²² is the primary consideration during the whole AVRR process.

In September 2016, IOM facilitated the voluntary return and the reunification of a group of 53 Ethiopian unaccompanied migrant children with their families. Due to a lack of formal alternatives to detention facilities, these 53 children had been detained in Malawi for several months after being found trying to cross the border illegally on their way to South Africa, where they hoped they would be able to find work.

The operation was led in partnership with the U.S. Association for International Migration (USAIM), in coordination with the governments of Ethiopia and Malawi, and was funded by Raising Malawi, a non-profit organization founded by the singer Madonna. Other partners including UNICEF, the International Committee of the Red Cross, Médecins Sans Frontières, and the Ethiopian Community in Malawi also played important roles in supporting the return and reunification process.

All pre-departure activities including screening interviews, pre-departure medical checks, flight bookings, and ground transportation to the airport were coordinated by IOM Malawi. IOM Ethiopia ensured the availability of post-arrival assistance consisting in transportation to the reception centre,

²² Article 3, Convention on the Rights of the Child (1989).

shelter, psychosocial support, family tracing, medical assistance and onward transportation to the children's communities of origin. Upon completion of the family tracing process, all minors were safely escorted to their respective homes and reunited with their families and relatives.

Madonna reacted a few days later on the Twitter account of Raising Malawi: "With all the madness in this world, I am grateful to share some light. All the 53

Ethiopian boys who were detained in #Malawi for over 10 months have been reunited with their families in #Ethiopia. Thank you #IOM and the #Malawian government for working with us to make this a reality", she wrote, signing the tweet with her initial "M".

3. COOPERATION AND PARTNERSHIPS

In today's increasingly interconnected world, migration has been rising steadily towards the top of the international political agenda. Owing to the dynamics and the volume of returns, and to the complexity of migration flows, there is a need for a more comprehensive approach to AVRR, and for effective dialogue and partnerships between all stakeholders engaged in voluntary return migration, both at the policy and programmatic levels.

Among other factors, partnerships reinforce the credibility of AVRR messages by diversifying information channels, supporting (potential) returnees in taking an informed decision, and by providing them with additional support for reintegration (beyond the assistance offered

by IOM directly). As such, partnerships have been at the core of AVRR in host/transit countries and countries of origin.

In addition, contributing to strengthen dialogue between migration stakeholders at bilateral, regional and global levels is one of IOM's strategic priorities in migration policy, and particularly in the field of AVRR. IOM's engagement in Inter-State Consultation Mechanisms on Migration²³ for instance, aims at providing evidence-based technical support; informing and influencing policy; advancing multilateral understanding and action on migration; and contributing to shaping practical solutions to contemporary migration challenges.

Migration media coverage: toward a positive and a humane approach

The partnership concluded by IOM Morocco with the Institut Supérieur de l'Information et de la Communication (ISIC) aims to foster a better understanding among future journalists and to promote a positive narrative on migration-related issues and on migrants themselves.

Participants at a training in Morocco, organized by IOM and the Institut Supérieur de l'Information et de la Communication on 31 May 2016.

In 2016, within the framework of the European Union project “Addressing the Needs of Stranded and Vulnerable Migrants in targeted sending, transit and receiving countries”, IOM Morocco has signed an agreement with the ISIC, one of the main training centres for journalists in the country, with the aim to improve the knowledge journalism students have on migration and to foster a positive narrative on issues related to migrants and migration.

On 30, 31 May and 1 June 2016, a training attended by 31 young journalists was organized in Rabat by IOM and the ISIC under the thematic: “Migration Media Coverage: towards a positive and a humane approach”. Among the 20 panelists who intervened during the various thematic sessions were several eminent personalities, including H.E.M. Anis Birrou, Minister in Charge of Moroccan Expatriates and Migration Affairs; H.E.M. Rupert Joy, Ambassador of the European Union to Morocco; Abdelmjid Fadil, Director of ISIC; and Ana Fonseca, IOM’s Chief of Mission in Morocco.

The sessions focused on a diversity of topics including: migration and its specific terminology; migration media coverage; the Moroccan media and migration context; and migration global trends and challenges. Interventions were grounded in concrete examples and experiences from other countries (Senegal and Qatar for instance). The training reiterated the necessity to apply critical thinking, rigor and sensitivity while covering migration related issues, linking journalism deontology to the respect of migrants’ rights.

Building on the success of the Rabat training, similar trainings were replicated by IOM in Mauritania, Senegal and Niger. IOM Morocco currently continues its collaboration with ISIC, by facilitating trainings within the ISIC’s Master on migration and media, and by promoting exchange visits and internships for journalism students in media and migration-related institutions.

Promoting the adoption of national policies on reintegration in Central America and the Caribbean

The Regional Conference on Migration (RCM), also called the Puebla Process, is a key platform for inclusive dialogue on migration-related issues in the region. In 2016, the RCM has adopted a “Manual for the Drafting of National Reintegration Policies”.

Since 2011, IOM has focused in promoting co-responsibility of countries of origin to provide reintegration assistance to their returning nationals. To do so, IOM has approached both regional and national platforms.

The Regional Conference on Migration (RCM), also called Puebla Process, has provided the best platform in the region to position the need for reintegration assistance. In 2011, IOM promoted a regional workshop on return and reintegration where Member States discussed their own institutional challenges in assisting their returning nationals. Following the workshop, IOM drafted a document titled “General Principles for the Return, Integration and Reintegration Assistance”,²⁴ which was later approved by the RCM as guidelines to improving states’ capacities to provide reintegration assistance to their own nationals.

Since then the issue of return migration has been discussed at length within the RCM. In 2015, the Mexican Presidency Protempore selected return and reintegration of migrants as a core discussion topic for their Presidency and subsequently organized various seminars with the participation of think tanks and a wide range of

government, civil society and academia representatives. It was evidenced throughout the year that locally endorsed reintegration-related policies are key to promoting effective and sustainable reintegration. To operationalize the main recommendations formulated during these consultations, IOM drafted the “Manual for the Drafting of National Reintegration Policies” which, as recommended by the RCM Member States, was discussed and adopted during a validation meeting, attended by a diverse group of governmental and non-governmental representatives in October 2016.

In November 2016, during the XXI Ordinary Meeting of the RCM, Member States approved the Manual and recommended it to be used by Member States as a reference document in drafting national reintegration policies. Thus, several countries in the region are currently in the process of drafting national protocols, coordination mechanisms and other tools that will strengthen the reintegration process of their nationals. In El Salvador, for example, IOM has been working closely with the National Reintegration Committee (under Foreign Affairs) to develop a country strategy to reintegration, now approved and under implementation, partially funded by IOM.

Strengthening and standardizing the delivery of assisted voluntary return and reintegration through the Migration Dialogue for Southern Africa

Based on the outcomes of the Migration Dialogue for Southern Africa (MIDSA), IOM has developed an operational guidance package, with SOPs and profiling tools that will be used by Member States of the Southern Africa Development Community (SADC) to carry out AVRR activities, in full compliance with human rights principles.

The Southern Africa region has increasingly seen mixed movements coming from the East and Horn of Africa and from the Great Lakes Region. Large mixed migratory groups, pushed by war, lack of protection, economic disparity or hope for better livelihood opportunities, have been moving south, passing through Kenya and/or the

United Republic of Tanzania towards Southern Africa. The countries of the SADC region (including Comoros) are all affected by migration, either as host countries, countries of origin, transit countries, or a combination of these categories.

²⁴ Document available upon request to IOM Regional Office in San Jose, Costa Rica.

The overall objective of the Migration Dialogue for Southern Africa (MIDSA) is to facilitate dialogue, enhance cooperation among SADC Member States, and to improve migration governance within the SADC region.

Since its creation in 2000, the MIDSA conference has contributed to shaping the migration discourse in the region and resulted in concrete recommendations which have been incorporated into SADC country-led initiatives. To date, a diversity of issues related to migration management have been discussed within this platform: the protection of migrants in vulnerable situations; refugees and asylum seekers; mixed migration flows; assisted voluntary return and reintegration; border management; labour migration; and trafficking.

In July 2015, the Migration Dialogue for Southern Africa (MIDSA) Ministerial Conference in Victoria Falls, Zimbabwe, issued a signed Ministerial Statement that approved a Regional Action Plan on Mixed and Irregular Migration. In the Statement, Ministers and Deputy Ministers of Home Affairs/Interior from Member States of the SADC recommended, inter alia, that SADC

Members States individually and collectively prioritize the sections of the Action Plan pertaining to the protection of unaccompanied migrant children, and begin the implementation of the proposed actions, as well as pursue the preliminary work on statelessness, alternatives to detention and return.

During a Regional Stakeholders Workshop held in Johannesburg, South Africa, in November 2015, the need to develop a guidance tool to facilitate AVRR activities was identified.

To address this need, IOM developed a Guidance Package, including SOPs as well as profiling tools to be used by SADC Member States to carry out coherent and lawful AVRR, in full compliance with human rights principles.

The Guidance Package is based on international and regional legal instruments, including human rights principles; as well as on existing guidance documents used and recommended by renowned actors in the field of assisted voluntary return and reintegration.

4. RESEARCH AND EVIDENCE-BASED PROGRAMMING

Each year, IOM Headquarters and offices worldwide conduct and produce a diversity of papers addressing the various dimensions of the AVRR spectrum.²⁵ Monitoring, evaluation, and research remain fundamental to ensuring

the efficiency of AVRR programmes; enabling IOM and its partners to enhance and improve their programme delivery; and helping to respond better to migrants' needs and specific vulnerabilities.

IOM Staff conducting a site surveying. © IOM / Muse Mohammed 2016.

²⁵ Several AVRR-related research can be accessed through the IOM online bookstore at www.publications.iom.int.

Exploring access to microcredit opportunities for migrants

In a study published in 2016, IOM Switzerland explored opportunities for improving access to financial services for returnees in their countries of origin. Following the publication of the study, several Microfinance Institutions showed interest in cooperating with IOM.

A Colombian returnee in his farm in Valle del Cauca.

As part of reintegration assistance schemes, IOM frequently supports returning migrants in re-establishing a livelihood strategy in their country of origin. As per earlier study, 84 per cent of AVRR beneficiaries who are given the opportunity opt to open a small business, but 65 per cent of those find they need to invest additional funds beyond IOM's assistance, and 28 per cent mention that they would like to expand but lack funding to do so (IOM Bern, 2013). In 2016, building on these findings, IOM Switzerland published a study, aiming to explore opportunities for improving access to financial services for returnees in their countries of origin.²⁶

The study examined the accessibility of microcredits to returnees in five target countries: Islamic Republic of Iran,

Mongolia, Nigeria, Senegal and Sri Lanka, showing great variation in general availability of microcredits and their accessibility to returnees. It appears that some institutions may have negative attitudes towards migrants (considered as unstable, not trustworthy, and some of the common lending criteria may be harder to fulfill for returnees – e.g. minimum duration of residence), who may also be reluctant to take up microcredit because of the complexity and risks involved. The study suggested that microcredit is an option worth considering but that microcredit cannot be recommended as a general solution for returnees who are in need of financial means.

Vulnerabilities and integration needs in Central Asia

Changing economic situation and regulatory framework in the Russian Federation has led to shifting migration flows in Central Asia: decreasing demand for foreign labour in a worsening economic climate in the Russian Federation as well as re-entry bans have interrupted the socioeconomic strategies of many migrants. Current demographic trends, economic growth prospects, environmental factors, as well as the regional geopolitical situation all point to a likely further increase and change in patterns of internal and cross border population movements within the region.

IOM's 2016 Regional Field Assessment of Migrant Vulnerabilities and Integration Needs in Central Asia analysed the recent developments in migratory flows in Central Asia, proposing strategies for assisting migrants affected by the changing context.²⁷ At both national and regional levels, states need to offer returning migrants opportunities for safe return and (re)integration into the local labour markets. The impact of the economic downturn, the presence of radical messages in religious communities in host countries and countries of origin, the sense of social injustice and desperation felt by certain migrants when they lose their legal status and are confronted with uncertain economic future, all point towards the growing need to focus on prevention of violent extremism. Effective prevention requires going beyond the security approach with more prominence to be given to the **integration approach as complementary to security measures**. This includes long-term engagement with migrants in vulnerable situations, their families and home communities through education, information dissemination and raising migrants' awareness on their rights and on the assistance and services available to them. It is also important to point to the crucial role that women play in transmitting values and shaping opinions which might be powerful deterrents to radicalization (women represent approximately half of all migrants in Central Asia).

Direct assistance activities, introduced by IOM in Central Asia in 2016, included, inter alia, return and reintegration, seed funding, legal, psychological and health-care support. It was provided to 79 migrants in vulnerable situations involving different degrees and types of vulnerabilities.

5. WHAT MIGRANTS SAY

While IOM's ambition is not to persuade all parties of the value of AVRR, a balanced and proactive communication about AVRR is as relevant and necessary as ever. In this context, stories of return are key to offer a realistic insight on the return process from the beneficiaries' perspective,

by empowering migrants to speak about their personal experiences, achievements, and challenges encountered, and by providing a visible space for return stories to be showcased.

Labour exploitation – Nepalese returnees recount their experiences

In 2016, a group of Nepalese migrants were told by an agent that they would obtain employment once they arrive in Sudan. However, upon arrival, a different agent received them in Khartoum, apprehended their travel documents and forced them to work in a plastic factory. IOM's AVRR support allowed them to return home and to reintegrate safely in their country of origin.

"We had lost our hope of going back to our country and family, but today, because of IOM Sudan and the police, we are going back to our family, our country."

In a letter sent to IOM on 11 September 2016, a group of Nepalese migrants narrate their plight as victims of labour exploitation in Sudan. As reported in the letter, they arrived in Sudan at the end of January 2016 encouraged by an agent, having been promised employment at a UN peace keeping camp. However, upon arrival in Khartoum, they were taken to work in a plastic factory, their travel documents were seized, and they were forced to work with no benefit other than food and lodging.

After enduring these conditions for six months, they ran away from the plastic factory to a UNHCR office to obtain help. UNHCR provided the migrants with immediate assistance and referred them to IOM.

Upon arrival at IOM premises, the migrants shared their story with IOM staff. They were not in possession of any official document, nor financial resources, and were in a state of shock after what they had been through. IOM staff provided them with basic protection assistance (food and shelter). With the help of Sudanese authorities, IOM retrieved the migrants' travel documentation and recovered their unpaid wages from the plastic factory.

Date 21/09/2016

Respected Sir/Madam,

We are from Nepal. We came to Sudan at the end of January. Our agent promised us that we will be working in the camp of UN peace keeping force. But the agent who received us in Khartoum took us to the plastic factory of Omdurman and told us to work there as a common labour. We told him we are not willing to work there and requested him to return us back to our country but he denied and threatened us. So being helpless we started working there. They provided us lodging and feeding only. They did not give us our salary. We worked there for six months.

IOM provided us food and shelter.

IOM started their process immediately and they brought our passport and salary from the company with the help of police. We had lost our hope of going back to our country and family but today because of IOM Sudan and the police we are going back to our family, our country. We cannot express our happiness in words. We are very happy and thankful to you. We will remember this until our last breathe of our life. Everyone who is involved in this came us to our life as a god. Allah. We are very very thankful and we will remember you all in our prays.

Thank you very much.

Excerpts from a letter written to IOM by a group of migrants assisted with AVRR.

Starting a new life back home after a long time living abroad

Leonardo lived and worked in Switzerland for 16 years prior to reaching out to IOM for assistance to return to his country of origin. He has also benefited from IOM's reintegration assistance and is happy to be back in Chile developing his own business.

Leonardo Latoja.

"I traveled to Switzerland after finishing my first semester in political science at the Pontificia Universidad Católica de Valparaíso (Pontifical Catholic University of Valparaíso) in Chile. I settled in Switzerland for 16 years, got married, had a child, divorced, and had countless work and personal experiences. I am now back in Chile, per my own decision, to set up a business.

There came a time when things became difficult because I couldn't renew my permit to remain in Switzerland. After being asked to leave the country, I went to the Red Cross to ask for help. They referred me to IOM where I learned about their AVRR programmes. IOM provided me with financial support for my return to Chile. I am now back in my country, and IOM is currently providing me with financial reintegration support for a personal business project I have in the audiovisual field.

While I was living in Geneva, I had the opportunity to work at *L'Usine*, a cultural center. There, I learned about electronic music and image projection (mapping). My project at home consists of mixing music with mapping, and eventually replicating the model from the cultural center. With the help that I received from IOM, I am buying the necessary resources. It is starting slowly, but I am confident that I will be able to achieve it. I am currently searching for a business location and putting together a group of DJs for the project.

I would tell those who want to approach IOM to trust them, they are professionals. I have also been at the IOM Chile office and received additional assistance. When I returned to Chile from Switzerland, they waited for me at each airport to accompany me while I waited for departure, and they gave me the tranquility and support I

needed so that I could arrive in Chile calm and confident. I advise migrants who are currently in difficult situations, like the ones I went through, that they should make the decision to return to their country if they are not well where they are or if they are suffering. They should not be afraid to approach IOM.

While in Geneva, I heard about the case of an Ethiopian national who received the same help as I did, bought a

cow and started making cheese, then bought another cow and another, and now owns a farm. You must start somewhere and, with the will to do so, you can be happy here, there, or wherever. I want to thank IOM for the help that they have given me, I am truly grateful. I would like to invite them to the inauguration of my project so that they can see what I have accomplished.”

Leonardo Latoja

Established in 1951, the International Organization for Migration (IOM) is the principal intergovernmental organization in the field of migration.

IOM is dedicated to promoting humane and orderly migration for the benefit of all. It does so by providing services and advice to governments and migrants. IOM's mandate is to help ensure the orderly and humane management of migration, to promote international cooperation on migration issues, to aid in the search for practical solutions to migration problems, and to provide humanitarian assistance to migrants in need, be they refugees, displaced persons or other uprooted people. The IOM Constitution gives explicit recognition of the link between migration and economic, social and cultural development as well as respect for the right of freedom of movement of persons.

IOM works in the four broad areas of migration management: migration and development, facilitating migration, regulating migration, and addressing forced migration. Cross-cutting activities include the promotion of international migration law, policy debate and guidance, protection of migrants' rights, migration health and the gender dimension of migration.
